Project Summary

Glenmore Dam & Reservoir

- Constructed in 1932
- Provides safe and adequate drinking water supply
- Reduces flood risks
- Provides recreational opportunities

Weaselhead-Glenmore Area: A Biodiversity Hotspot!

Columbine flower: J.Weiler, Wildlife photos: Tony LePrieur

Recreation

Incredibly important area for recreation; providing Calgarians opportunities to connect with nature, community and to stay active.

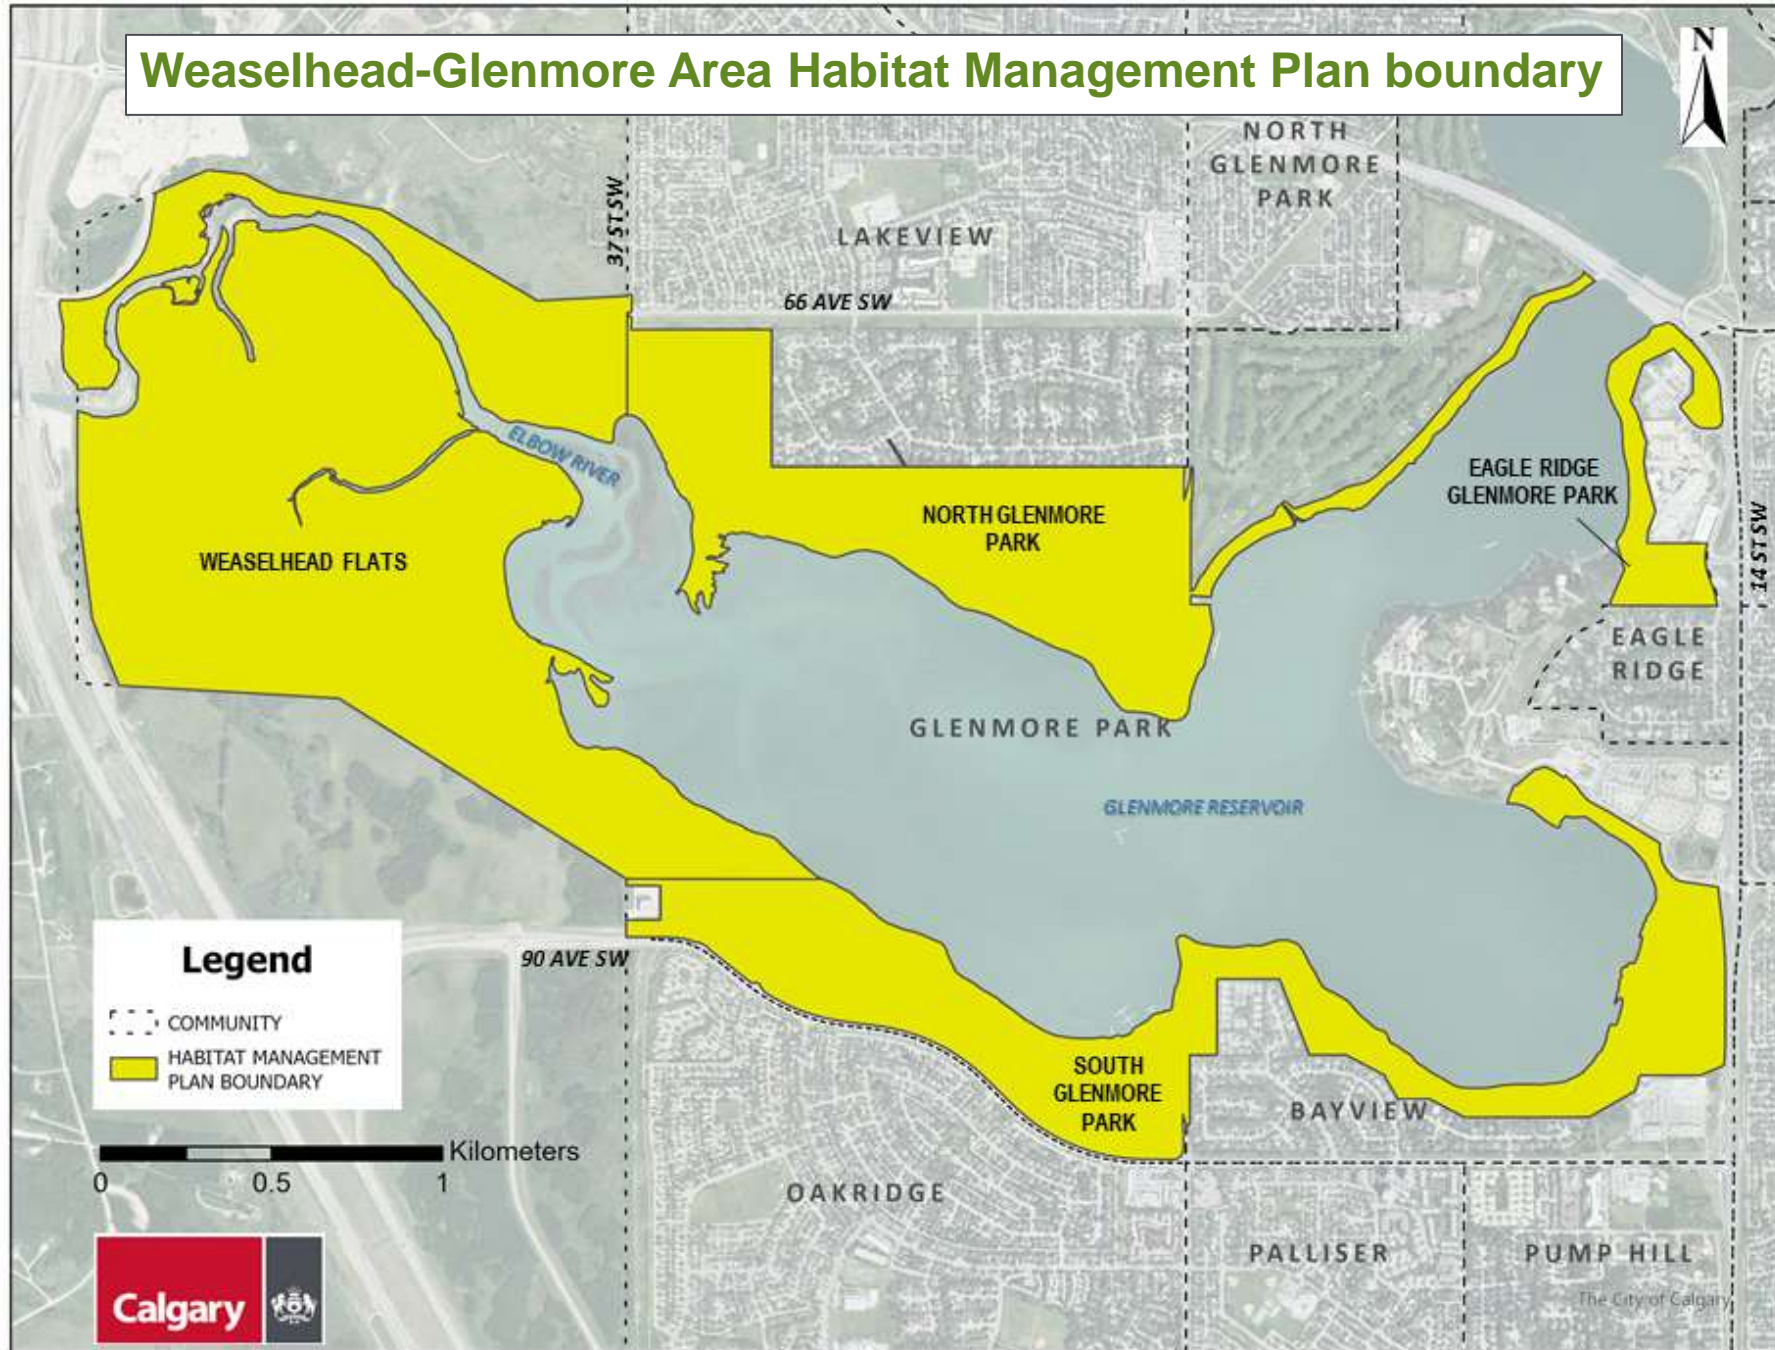

Purpose of Habitat Management Plan

Provide a clear strategy and timeline for managing the ecological health and function of the park to achieve biodiversity outcomes.

- Focuses on habitat conservation and restoration
- Prioritizes resource protection while balancing nature-based recreation
- Identifies collaboration opportunities

Weaselhead-Glenmore Area Habitat Management Plan boundary

We want to hear from you!

- We want to better understand:
 - park usage;
 - types and location of activities you enjoy; and,
 - any concerns you may have.
