

Verbatim Comments

Verbatim comments presented here include all feedback, suggestions, comments and messages that were collected online and in-person through the engagement described in this report. All input has been reviewed and provided to Project Teams to be considered in decision making for the project.

Any personal identifying information has been removed from the verbatim comments presented here. Comments or portions of comments that contain profanity, or that are not in compliance with the [City's Respectful Workplace Policy](#) or [Online Tool Moderation Practice](#), have also been removed from participant submissions.

Wherever possible the remainder of the submissions remains. No other edits to the feedback have been made, and the verbatim comments are as received. As a result, some of the content in this verbatim record may still be considered offensive or distasteful to some readers.

Park 1: Large Central Area

Q: Which concept layout do you prefer and why?

1) There is nothing (splash park)like this, around this area, parents with younglings have to travel far(airdrie) 2) Cricket is played often with Hardball, no protection for other passing by, and I am indian, few people can enjoy 3) Mixed amenity park checks multiple boxes, many age groups, walkers can walk without any ball hitting on their heads, kids can enjoy slash park in summer without having that ball hitting on their heads again, I do not want to keep repeating until this points drives home for the decision makers, same reasoning goes for baseball
1A
A
A combination of water park/ wading pool, bike path and picnic tables would be great. It's family-friendly and residents will enjoy.
A cricket field is highly needed as damage is being done to existing parks by cricket players.
A cricket pitch takes up a lot of space for the use of a relatively small population. mixed amenity allows more flexibility. also maintaining a cricket pitch uses up natural resources which is a waste

A cricket stadium in our city would not only provide a platform for sports enthusiasts but also foster a sense of community pride and unity. It can boost local economy through events, attract tourism, and promote a healthier lifestyle by encouraging physical activity and engagement in sports. Furthermore, a cricket stadium could serve as a venue for cultural events, concerts, and other entertainment activities, contributing to the overall vibrancy of our city. It has the potential to create job opportunities, stimulate business around the vicinity, and showcase our city on a national and international level, enhancing its reputation and appeal.
A good splash park brings community engagement and also helps with heat, and is the best! Right now we have to drive to airdrie to experience a quality splash park.
A lot of children in the area that can take advantage of this.
a lot of kids in the area
A mixed park gives an opportunity to everyone to enjoy the space rather than one dedicated group of people.
A more diverse group of people can use this area.
a nice park built right will be AMAZING for our community! Splash park gives more options
A park should have something for everyone and their different reasons for enjoying a park
A proper cricket pitch is very uncommon within Calgary. Having a proper can be quite important for many cricket players
A splash pad would be wonderful for our communities with little children plus other amenities. Cricket pitch just focuses on one sport.
A splash park is more beneficial to a larger population. More geared towards more than 1 culture.
A splash park specifically would be great - there is nothing in the area like that and residents have been asking for one for a long time. We also have cricket pitches already in the NE along with a lot of field space.
A splash park will be great to have in a community with so many kids and refreshing on hot days.
A splash park would be great for the growing number of kids in our community. It would give them a sense of belonging and allow parents to take their children somewhere close by. Many activities for kids to participate in are further from here or they are over crowded. There's plenty of space for cricket and open fields. Spray park would be amazing!
A variety is best to try and suite everyone
a variety of options allows for multiple people of all ages and backgrounds to utilize the space in a way that feels most suited to them
Absolutely a must for kids and adults a like. There is heavy presence of families here. Great way to build a better community.

Accessible to more people
Actually, lot of people prefer cricket and every year canada and other clubs organise cricket tournaments and it will be good for city as well as citizens.
All good
All-inclusive
Allow for broader spectrum of community members to engage
Allows a more mixed variety of activities to be undertaken rather than just one.
Allows children to be active
Allows more people to engage
Appeals to a larger demographic.
Appreciate sportsmanship
Area 1 concept B mixed amenity splash park
As it is NE community, most of the youth like playing cricket and having a park dedicated to this will give a lot of good support to them and also keep them healthy and away from wrong doings.
As our neighborhood has people from all the ages, it would be a better choice to go with mixed option to satisfy everyone.
As per cornerstone community we donot have a proper kids park itself and exisiting one istoo crowded
As we have a lot of growing kids, I want something for the little kids to play with. Also, there isn't any spray parks nearby.
Availability of more diverse activities, we have cricket pitch in Corner Meadows.
B
B Mixed amenity
because everyone can enjoy a spray park whereas cricket is a sport that not everyone plays
Because for this fun we go to prarie wind park that is far away from us
Because I don't enjoy cricket and the splash park would be good with the hot weather we get.
Because I have small children, and if would benefit them to have a place close to home where they can go and use it on hit summer days. A waddaling look would be a great idea too!!
Because I like sports and I like the open concept. The open concept appeals to me
Because I love playing cricket and I believe Calgary needs better pitches and grounds for cricket.
Because I saw so many people played cricket in this community

Because i think largely cricket is a big sport in the community most of the kids and adults play it. Something tk enjoy for the adults as well as kids
Because it could be used by anyone as a single use is limited to some people
Because it engages all people of community to get together not just the cricket people. and there is already close by cricket spots
Because it gives us freedom for versatile dances to be considered for mass moments in the city. thank you yyc!
because it is a fairly new community and there's not a lot of options for every age group to be around so i think it'll be nice to have a common area for everyone as a mixed amenity
Because it will be very good if these types of park will be nearby
Because it will provide purpose to more people to visit the park
Because it will serve multipurpose
Because it's mixed abnd we need indoor community center.
Because its a new community and there are a lot of young family's moved here with very young kids
Because kids wants and it's limited in Calgary
Because not everyone plays sports and we need a mixed park that will cater to all residents
Because that's fastest growing sports in NE and we are in dire need to cricket grounds.
because the cornerstone community is growing in population day by day and just a cricket pitch won't benefit the majority in any way.
Because there are very few cricket pitches in Calgary and its good to have one where matches can be played
Because there is more variety for the children who play there.
Because this large area are useful for our young generation and physical activities
Because we have a lot of young families here with lots of children. So having a splash park would be ideal and great for young families like us.
Because we have here so many people in calgary who play cricket a lot and wherever we go it's booked already so we want a cricket ground like this too. I will really appreciate if we get more facilities like this.
Being a cricket player myself and being part of the community I feel like we need more proper cricket grounds in the city
Best choice for all kinds of family and kids. Not just one particular group.
Best to have several amenities to maintain diversity. Not everyone in the community may be interested in cricket.

Better for a community filled with small children
Better for kids
Better option
Better place for kids, playground for kids
Brings more different people with varying interests of the community together.
Can be used by many
Can be used by more people
Cater individual families needs.
Certainly! A mixed amenity offers diverse recreational options, accommodating a broader range of interests and preferences within a community. This inclusivity promotes widespread usage, making the space more versatile and appealing to a larger audience. In contrast, a single large cricket ground might cater primarily to cricket enthusiasts, limiting its overall community engagement. By providing various amenities, you enhance the overall utility and accessibility of the space, fostering a sense of community and shared enjoyment.
Children can enjoy it. Many moms don't know driving can take their kids.
Children splash, large sitting area, sheds. Picnic areas
Community need a cricket pitch.
Concept B
Concept B
Concept B
Concept B
Concept B
Concept B - Mixed amenity
Concept b because we need amenities
Concept B because you get a lot more uses. Would love a spray park for our young kids. As I'm sure a lot of people would with there being many young kids in this community.
Concept B this concept will be suitable for everyone not just for cricket only
Concept B with spray park
Concept B would be best as multiple amenities benefit all kids with different ages
Concept one would be great for the whole community. I can see it will allow more multicultural family and different ages to use. Out of NE Calgary I have never seen any splash park. And for cricket park I have already seen many being provided; which include in saddletown, rotary challenge park (west wind) and other different communities. I find this very unfair.
Concept-B
Conespt B and water park

Could we also please include in the plan a fenced dog park for small and large dogs
Cricjet is a growing sport bur does not havr rhe facilities therefore a cricket ground qould really help promote the sport
Cricket
Cricket area
Cricket game can engage the community.
Cricket ground
Cricket ground should not in the public park.
Cricket ground.
Cricket is a fast growing sport in Calgary and we should try our best to promote it by adding more amenities to give opportunities to upcoming generations engaging in the sport.
Cricket is a growing sport in our community and need more support.
Cricket is a sport that is most popular in that community in the Summers.
Cricket is booming in the city especially in the NE and we have limited facilities so this would go a long way to providing support for this growing sport.
Cricket is like any other sport, and we have only few places where we can play , more over the market for cricket is in billions, giving young enthusiasts a very good opportunity to build a career and build a name for Canada in the International Cricket.
Cricket is one specific sport that identifies with largely one community/ethnic community. There are people from different heritages and cultures living in cornerstone and I wouldn't want to limit the versatility of the park/large area to just one sport. Mixed amenity such as a splash park along with other uses does give access to adults and children. Cornestone has many children and families and a mixed amenity design would allow for activities that the whole family can enjoy.
Cricket is only for cricket playing people Splash Park is for everyone
Cricket needs to be given more importance as there are very few fields but tons of players. Other field sports ground sit empty
Cricket pitch
Cricket pitch
Cricket pitch
Cricket Pitch
cricket pitch
Cricket pitch
Cricket Pitch
Cricket pitch

Cricket pitch It will encourage more events on evening and weekends throughout the summer
Cricket pitch as we know games keeps depression away and cricket has been growing sport in calagary .
Cricket pitch is already developing in cornerbrook I recommend to have splash park as it is good source for kids and seniors to enjoy and spend time
Cricket sport is highly under served
Crickey, volleyball and playing area for kids
Criket pitch functional for all seasons. Splash park optimal mostly for summertime.
Dedicating the area to only one amenity would help only a small population. Having multiple amenities would-be useful for larger group of people.
Different age groups and types of people can use.
Different amenities can cater to different taste of audience
different groups can enjoy the open space together.
Different options bring people together with different choices not obligated with one options. Cricket pitch does exist in another community closer to cornerstone.
Due to the neighborhood, where there will be more young families with children, we need more and different types of activity area to keep everyone active.
Easier for parents in the area to take kids as well as there are no rec centre's or large parks in the area.
engage young kids population in the neighborhood
Everyone can enjoy including kids
Everyone can enjoy the space
Everyone can enjoy.
Everyone can use splash pads but not everyone can play cricket
Everyone can use this.
Everyone have kids at home and so many kids can play at a time, but if it's cricket pitch, only 11 players can play for whole day. We need park for families, not for few people
Everyone should feel included in these activities
Expand cultural diversity
Family friendly for all ages. Something unique to the community.
Family oriented and inclusiveness of younger kids demographic in mind
For all age groups
For everyone
For everyone use cricket pitch will benonly for certain players
For kids
For my kids
Fun for everyone, not everyone can play sports due to disability
Fun for kids in summer

Gives everyone a choice
Gives more access to different people for different uses
Great concept for the cricket loving community of cornerstone.
Great for all children in the summer. As westwinds is always crowded.
Helps with all ages.
Huge kids population not everyone into cricket. Need something that kids can enjoy in winter times.
I am older and prefer to play sports
I am wondering if the capability to have any events on the large space is possible such as festivals, or seasonal events that attracts all age groups.
I believe in mixed amenities so many people can enjoy park at the same time.
I choose Mixed amenity because every one can engage and use the facility
I chose concept B because it provides variety for all ages. I strongly believe that being exposed to various outdoor activities helps us stay active and brings the community closer together. The Cricket Pitch is a great idea but not within a community. It should be built outside of the community and be able to support the volume of spectators with their own parking area. Hosting an area that large is disruptive towards residents because you will get people parking in the residential areas like when Country Thunder was being hosted in Prairie Winds.
I chose Concept B for the mixed amenity because I want access to tennis courts, volley ball courts, places to walk, have picnics and barbecues with family and friends. I also love trees and gardens.
I don't like cricket and my kids will use the splash park.
I don't play cricket, and my kids would love a splash park.
I don't think we have a dedicated cricket pitch in the city.
I feel like having mixed amenity is good because there can be more activities that can be done.
I have a 2 yr old and the spray park would be something we would use, we do not play cricket.
I have a child that would love to have a splash park in the area
I have a young family and I know there are alot of younger families in our community that would love this for the summer There are already so many places to play cricket. A splash park can't exist without a plan! Put in the splash park
I have kid and I always go to prairie park and it's far from here so It will be closer for us to go in corner stone
I have kids
I have kids and lots of families around.
I have small and they love water. We don't have anything similar to this in the neighborhood. It will be a great addition.
I have small kids and I asked them what they want and they choose the splash park!
I know lot of kids would like splash park. Only one in the nE and it's crowded
I like mixed use -.my family can go try different sports expose them to variety of spaces

I like playing cricket.
I like the variety offered here.
I like this with amenities
I like to have one big ground with other amenities.
I picked mixed amenity because I know I wouldn't enjoy a cricket pitch as much as a mixed amenity and people I know, my family, and I would go to the park more often and engage more if there was a mixed amenity and not as much if there was a cricket pitch and a lot of people I know don't really enjoy cricket
I prefer it because there is such a lack of large space cricket fields in the city (especially in the south of the city) that any new fields will only help alleviate the back log of teams/fields that are in use. It's a growing game and needs the infrastructure to go along with it
I prefer mixed amenity (Park area 1 Concept B). To me a community park is a place where people come together so it should be inclusive of all the different gender, age, and ethnic backgrounds. Dedicating such large real estate to just one amenity is discourage engagement from all the different groups mentioned above. e.g. a cricket pitch would only engage a specific age and ethnic group while a mixed amenity will provide everyone with an opportunity to be able to enjoy the facilities.
I prefer mixed amenity especially on Summer time that you can do a lot of things than walking or running only
I prefer the cricket pitch because we need the cricket team in the world because everyone want to tell the peoples Canadian have pitch and player the cricket ground is better for summer and people enjoy the weekend when the cricket players r playing the cricket so it's good for youth and community. Thank u
I prefer this because it can be used by all age groups. Children can enjoy splash park in summer and flexible space helps other. I strongly prefer mixed amenity
I prefer this concept because it allows for people young and old to come together during hot summer weather's to cool and and relax
I prefer this mixed amenity since there are a lot of kids around here and I can also bring my daughter here.
I think it would be nice for people who aren't into sports that much.
I think it would more beneficial to all residents to have a multi use area that has a little bit of everything. Having just cricket alienates anyone who doesn't play cricket.
I think mixed amenity will be more beneficial for diverse group of people. Cornerstone is very diverse community so making one big cricket ground will not serve the purpose. if we have open flexible play area we can play any sport on it rather just fixing on one ground.
I think that it would be nice to have something in the community that has space for all types of activities
I think the community in this part of town will enjoy cricket more than the splash park. Although I do think the splash park will also be enjoyed just as much.

I think the splash park would allow for a greater percentage of the whole community to use it. We already have a cricket pitch fairly close over in Saddletowne and from my observation it's predominantly the South East Asian community that uses it...we do not have enough splash parks in the NorthEast end of the city - Prairie winds park gets disgustingly congested during the summer months.
I think this is a good activity for young kids.
I understand that there is a shortage of cricket pitches in Calgary.
I want to be active in every sport not just one.
I would also like to have a picnic area with shed for families
I would like to know why there is funding for this regional park in the middle of nowhere, while Richmond Green Regional Park, inner city, densified area was SOLD to provide funding for its upgrades despite ENMAX having record profit to the city.
I would love for it to be a mixed amenity park with more activities for kids like splash park, rides, tubing hill for winters as there are lots of kids in the neighborhood. Just like prairie westwinds
I would love to see mixes amenity in my area
I would not use a cricket pitch but would be nice to have a spray park or place for birthday parties
I'd like to see an outdoor pool and splash park like in Prairie Winds Park. The pool would be great summer enjoyment.
If it is a Mixed amenity people of all ages can participate. There is no such places nearby so would like to have such place that could be fun for all.
Immigrants from south Asia like India, Pakistan prefers cricket and believe there aren't sufficient grounds for cricket.
In summer time we play cricket every week and we don't have a specific ground for it
In the summer time a splash park would be highly used by kids and adults
Introducing cricket in Canada
Is good for kids during hot summer days were they can enjoy nice cool water in the community instead of traveling outside of there community to enjoy these facilities
It allows for more participation by all groups of people
It allows more variety in activities and gives more people and different ages to be involved
It appeals to a larger group. There are lots of children here... spray park would be fabulous addition
It benefits every body
It caters to more types of people

It give more options for everyone
It gives an open area a chance to be used by everyone. Sports pitches remain closed to public use due to maintenance
it gives an opportunity for full participation for old and young
It helps family including kids and every age people in a family
It is a much needed amenity in the city. The lack of cricket pitches in the communities leads to a lot of youth missing out on the sport they love. Driving around the city I have noticed crowded school playgrounds without the proper facility to accommodate the cricket players. This will go a long ways to helping direct those kids to the proper facility and playing the sport in the way it's meant to be played.
It is fair for everyone since all the kids and other people can use mix amenities
it is good for multi cultural and multi family activities.
It is good for the kids to play, there are many cricket pitches in close proximity in North east
It is more inclusive and can cater to a wider variety of uses. It has things for all ages instead of a cricket pitch which caters to a specific age group and demographic.
It is more inclusive for different types of people with different ages, a abilities and interests. There is more areas for people to gather than just one space which feels like it is not the best usage in an area that is in desperate need of more gathering spaces. I would be more likely to bring friends and families to a more dynamic space with multiple options rather than just a cricket pitch
It is open for everyone. Cricket pitch will be restricted
It looks like it could have a level running/walking track around the outside. I'd really love such an amenity. Sloped meandering pathways are not great for limited mobility.
It much more fun
It should be there for all age groups to enjoy kids adults and seniors families. If it will one specific pitch or court like cricket then what about others who do not do those sports. So it should be mixed amenities
It will allow more people of all age groups to engage in physical activity.
It will be good to have mixed amenity rather than focus on any one sport
It will be great for kids during summer time
It would be awesome if me and my family can live near a cricket pitch since we are big cricket fans.
It would be good to have mixed amenity because the cricket pitch takes more space, and there should be clean washrooms.
It would cater to more people and more interests in a very diverse area of the city.
It would serve a more diverse age population.
It's a young couple community and I see lots of kids around who needs different kind of activities to learn and explore. It will be great to have mixed concept so that everyone can enjoy the space created.

Cornerstone Regional Park

Report Back: What We Heard

January 2024

It's accessible to more people
It's better for people to cool down in the summer and it's more fun for children
It's better to have mixed amenities rather than focusing on one sport (cricket). I don't play cricket!
it's one of the most played sport in calgary and many people would choose cricket ground as an option
It's the need of the area.
It's unique and will help children experience a fun summer activity while being cost effective.
its comunity park
its for mixed communities
It's good for kids , it's a newer community nothing good there no fun for kids
it's more diverse, all ages of people can enjoy.
Its nov 1 2023. Canada cricket team selected for world level T20 tournament. Cricket is growing in our area and country. Lets give a great and best cricket pitch to players. So one day canada will be recognized as a growing country.
Just more fun for little kids
Kid friendly
Kid's friendly
Kids enjoy it during summer. There is not much spray park in this area, so we need one here
Kids friendly
Kids friendly
Kids friendly summer activities
kids love splash park, and right now we have to travel far to go.
Kids love splash parks
Kids love splash parks
Kids need this in summer thats why we go prairie winds park
Kids will enjoy this a lot
Kids will have more options to play rather than one big area for cricket which already exists in a nearby skyview park
Kids will have some fun activities to do and parents will be happy.
Kids, teenagers, working people and retired adults should be able to use it.
Lack of cricket ground
Lack of cricket pitches in Calgary
Lack of cricketing facility around N.E. calgary

Large central area
Leave room for a dog park
Less grounds for cricket , so can be utilized
Less number of cricket grounds is hampering the cricket fraternity in Calgary. We appreciate city to look into it. We only 3-4 grounds dedicated to cricket in the entire city of Calgary with a huge cricket fraternity of 130+ teams and huge leagues. More grounds will give more game time. Water park are important but we have many and it doesn't take the entire ground for it.
Less space for dog poop to be left uncleaned, more activities for the kids to do
Like the way is our community expanding and kids has not many places in NE
Looks great for activities n big games
Lots of kids in area & it would be good for them
Lots of kids in neighborhood.
Lots of kids in the area !
Lots of young children in this area as well as teens and young adults. Would be amazing to have mixed amenities for all ages.
Lots of young families here that would benefit from the splash park
Many can use
Many families with kids and there is no where close by to take kids to swim or even splash park. This is very much needed in this area. It will also attract more people.
Mire inclusive
Mix amenity
Mixed
Mixed
Mixed
Mixed
Mixed amenities
Mixed amenities
Mixed Amenities
Mixed amenities
Mixed amenities because a splash park would bring more children out
Mixed amenities because different for different culture and lifestyle to choose from.
Mixed amenities concept is preferred. Splash parks are common in many other communities across Canada and having one in the New North East would be used by far more users than a single use site dedicated for one sport.
Mixed amenities offer more choice/variety for the community.

Mixed amenity
Mixed amenity - more functional for all people and all demographics
Mixed Amenity - provides multi function use, including splash park for children which will allow for the young families in the area a place for relaxation and meet other young families.
Mixed amenity (splash park and so)
Mixed Amenity (splash park)
Mixed amenity allows for everyone to use the space as needed for their family. I also like the splash park for children.
Mixed amenity allows for more diverse types of activities and things to do and I think is a better use of the space.
Mixed amenity along with splash park
Mixed amenity appeals more to the larger neighborhood and can have multiple uses
Mixed amenity as there are a variety of families in this neighbourhood and we would love the options to do several things and not just have a cricket field
Mixed amenity as we don't have this in our area
Mixed amenity can be used by kids youngsters and adult age groups. So I would go with it.
Mixed amenity can serve multiple age groups. Also these types of amenities will be enjoyed by people with different preferences and interests. If we designate the entire area to just one sport then 95% of kids or other age groups will be left out. If we designate such large space to just one sport it's a waste of space .
Mixed amenity definitely, it allows much more of the community to use the space.

Mixed Amenity is use ful for people with different interest. A cricket pitch will be only useful for few people who uses it where as mixed amenity will be utilized by everyone in the community.
mixed amenity like splash park
Mixed amenity splash park
Mixed Amenity Splash Park
Mixed amenity splash park
Mixed amenity splash park
Mixed amenity -splash park. Lots of young families and with small children will benefit from it
Mixed amenity will attract all age group, gender and races.
Mixed amenity will be more accommodating to different age groups
Mixed amenity will give option for more age groups to enjoy at the park
Mixed amenity will have more options for public. Splash park is needed for kids as we don't have any in nearby communities.
Mixed amenity with cricket pitch as well for mixed sport usage.
Mixed amenity with splash park.
Mixed amenity with splash park. This will best for kids they can enjoy through out the year.
Mixed amenity would appeal to a wider group of people. A splash park would be perfect for children and there are many in this area. With summers being hotter this seems like a more useful idea.
Mixed Amenity would be the best with a tennis court, basketball ground and water area.
Mixed amenity would suit better for this multi-cultural communities of Cornerstone, Skyview Ranch and Redstone.
Mixed Amenity would support all families who wish to utilise the space.
Mixed amenity, splash park is a great way to engage the whole family along with kids of all ages.
Mixed amenity. I prefer this because it gives access to all types of people to enjoy the park and not limited to just sports. This area has a large population of kids and youngsters whi would enjoy mixed amenities. Whereas cricket is played in the age group of 28-40 years old only.
Mixed amenity.
I think this caters to the diversity of the area as not everyone is interested in one particular sport/amenity.
Mixed amenity: more residents can enjoy and take part in different activities

Mixed amenities can be used by all age of people as well as by the people with different sports interest as well. I love cricket, I used to play cricket but a cricket pitch ground will be unfare for other people live in community and don't have an interest in cricket..
Mixed brings diversity
Mixed is always better and we should have a cricket pitch too in it.
Mixed is better for more diversity rather than an open space for just cricket
Mixed Park
Mixed so more people and more age groups can enjoy.
Mixed will give chance for people with different choices to utilize the facilities rather than just 1 sports activity used by 1 type of use
Mixed with splash park
Mixend amenity is good for residents as they made it in the Livingston area. The Mix amenity should be for local and surrounding areas for both adults and especially for kids. Try good use of space like Shouldies Park not like Prairewind Park. City-made Shouldies Parke is very nice and colourful and kids like it The city uses good space of Shouldies park. Please don't make park like Prairewind
If a made park in the shape of the ground like soccer or Cricket - outsiders will come only and play and not beneficial for local kids and the local community and it will only create traffic chaos like what happened in Cityscape.
Make Splash park, Picnic table, colourful playground, small ground for cricket and Soccer and specially for basketball, Tennis court.
Please don't make parks like Cityscape -it's a total waste of money and space.
Thank you
more (redacted) will come out
More accessibility to kids and families and people who don't play cricket. It's less restricted and more open.
More activities for a larger group of people
More activities to enjoy!
More amenities for a variety of age groups in the community
More appealing for families. Lots of young families in this area.
More choices
more choices more people
More civilians will get use of the park
More diverse and options for both kids and adults
More facilities
More family friendly.

More for everyone. Not all people like one thing so having multiple options is best.
More fun for the summer time
more inclusive to the population, can be used by more people
More number of people can use space in same time
More number of people will use
More options for everyone
More options
More options and will get more use.
More options for people of all ages in recreation
More options for use.
More options to include the diverse needs
More people and kids can engage
More People can enjoy it.
More people can use the space and not on specific group.
more people can use the space because of the different activities
More people can use this park.
More people need to engage. Cricket pitch limits that
More people will benefit from it
More people will get benefit from park.
More people would be able to use the amenities
More people would engage and enjoy the park if there was more than one activity that could be done and parents could have their kids enjoy many things other than ONLY cricket
More usage and variety that fits many residents and lifestyles
More use of space and more amenities
Rather than single use
More variety
more variety
more variety
More variety and dynamic space
More variety for more of the people of the community to enjoy. Just a cricket field is limiting.
More variety of use. There are already smaller sports fields in nearby communities.
More variety so everyone can enjoy
More versatile and more options for the overall community population that is not targeted for a specific group.
more versatile and would encourage use by more people as there is more likely something for everyone

Most communities in the area has already cricket and football fields and as a observed in the houses in the communities kids love to play basketball as well so it will be good for the commnunity to have basketball courts as well and at the same time swimming pool during summer cause the swimming pool n prarie winds are always full during summer time
Most families has young kids Would be beneficial for them
Most of people in these communities like cricket.
Most of the people who lives in North East Area love to play Cricket ⚬ and watch . Having Pitch and other amenities with it will give them enough opportunities to come out and play the game they love . Also having a splash park kids would love it and families can enjoy it in summer .
Multi options for kids and families
Multiple ameneties
Multiple amenities appeal to a wider population and same space can be enjoyed by more people as opposed to a single purpose design like a cricket field. There is a desire for more walkable spaces away from traffic in this community.
Multiple options for more activities and people
Multuple options for everyone rather than the other option just for cricket.
My family loves this and fits our needs.
My kids love to play cricket and there is hardly any place for them to play
Nearby communities have a majority of young families with small or growing kids. So assigning area to splash park and mix of other amenities will benefits all kinds of people, instead of dedicating the whole area to a specific sport. Also if splash park is designed keeping every age group in mind can become a very good attraction. Example Chinguacousy Park in brampton, Ontario. Also the nearest splash park to cornerstone area is minimum 20kms. Prairie wind park or travel to airdrie or NW
Nearby splash park is Prairie wind park and is very nice , but it is very busy in summer . We want some water fun for kids in that area as we'll.Im living in skyview
Nearest spray park is Prairie winds park which is far away. Redstone, cornerstone, cityscape, skyview and savanna can benefit from this.
Need every age group to use the facility.
Need proper ground and pitch to okay cricket in Calgary
Need something for kids
Need space for outdoor games such as cricket.
Neither. I would like a fenced in off leash dog park please.
No splash park is around
No splash park nearby already have fields for cricket.
North East Community has majority of Diverse population that belongs to South Asia(INDIA PAKISTAN BANGLADESH AfghanistaN and SriLanka.) And south asians love cricket more than anything else :)

Not everyone enjoys or plays cricket; mixed amenity is preferred as it does not discriminate against anyone. Just because it's located in the NE it doesn't mean we have to have a cricket pitch; people all over the city can use it if it's mixed amenities.
Not everyone plays cricket
not everyone plays cricket and this is going to serve a huge community of people
Not everyone plays cricket or any single sports. Park with mixed amenities will help kids and residents to engage in various activities and connect as a community.
Not everyone plays cricket, but there are lots of kids who will enjoy the splash park.
Not everyone plays cricket. More variety, more people able to use the amenity
NOT interested in CRICKET. Need different things to bring community together . WE NEED A DOG PARK!!
Not limited to only Cricket ground, It has to have something for all ages.
Nothing for children available in NE
Number of young people are growing in the town, and it's time for city of Calgary to develop few good cricket pitches to keep kids off the street. There are many football and baseball grounds unused where cricketers play cricket without proper pitches in NE.
One big cricket pitch
One large sport amenity
One large sports amenities so we could have more kabaddi matches for punjabi people to enjoy. (Kabaddi is a punjabi wrestling match)
One sport does not serve the interests of such a large community. We should be catering to different needs and interests. Additionally, there is a cricket ground in nearby communities
Only few and dedicated can play cricket . Mixed amenity can be used by everybody specifically kids .
Park 1 Concept B
Park 1 Concept B
Park 1 Concept B - Mixed amenity
Park 1 Concept B. There will be more choices and variety of activities to do.
Park Area 1 Concept A
Park Area 1 Concept A
Park Area 1 Concept A
Park area 1 concept A
Park area 1 concept A

Park area 1 concept A cricket ground
Park area 1 concept a I prefer cricket pitch
Park area 1 concept B
Park Area 1 Concept B
Park Area 1 Concept B
Park Area 1 Concept B
Park Area 1 concept B
Park area 1 concept B
Park Area 1 concept B
Park Area 1, concept B
park area 1concept B
Park area concept A
People have different preferences for activities, so offering multiple amenities invites more people to use the space.
People of all ages can participate and stay healthy
People who stay around like yis game
place for children
Play area for kids, swing slides, ziplines etc
Please consider all ages. In a mixed amenity park, you are accommodating all ages. There will be something for everyone to enjoy rather than the park being designed for primarily one activity, that younger kids cannot enjoy.
Police and fire and transit and about 250 % less parking enforcement and a cut in property tax to 2015 levels as I'm 1000 more now then in 2015 with only increasing parking athority in area
Prefer multiple amenities because not everyone likes cricket. I have little kids who would love a splash park and swimming!
preferred mixed amenity for variety of usage to cater to different ages. Also, northeast has lots of toddlers and graders who would benefit this kind of mixed amenity.
Promotes more people engaging with the community
Provides amenities for all
Really want a mixed amenity splash Park!!
Serves the interest of all: inclusive
Seviour shortage of cricket facilities
Should have variety of options for people to choose from.
Since it's mixed it has a variety of recreational spaces and will have something for everyone, each person in the community instead of just those who enjoy cricket.

Skating rink
So all ages can enjoy the park, concept 1 is only very limited age mainly adults will play cricket but for family and senior citizens concept 2 is will serve all ages needs as it still has a big field which can be used for any kind of games
So every one can enjoy
So everyone would enjoy including kids and young children. not everybody plays cricket
So it can be used by kids, seniors and young people.
So kids can enjoy both summer and winter
So kids can enjoy the park.
So that many people can enjoy at the same time
So that people of different age groups can use the facilities.
So there is space for every age group.
Something for everyone!
Something for everyone!
Space for multiple amenities would better suit the community as a whole, as there would be enough space for people to do different things.
Space will entaintain more audience. Please include tennis court as well ,Nearest city tennis court is 25 minutes driver from cornerstone.
Specific areas for specific needs make the most sense to me
Splash area
Splash park
Splash park
Splash park
Splash park
Splash park
Splash park
Splash Park
Splash park
Splash Park
Splash park
Splash park
Splash park
Splash park
Splash park and pagoda is needed in this area. The NE needs more places for kids because there is more kids crammed into the area then the rest of the City.

Splash park can be used with kids while open space and cricket is for adults only.
Splash park for the kids!!
splash park is good during summer for kids to enjoy. also there is a lot of dogs by the communities nearby so it would be nice to have a fenced dogpark too
Splash park is open to numerous children in the area and open to each and every group. While a cricket pitch is only for the one group of people that play cricket and doesn't open up for everyone.
Splash park mainly for kids
Splash park mixed amenity
Splash park with multi purpose activity so children and other age people can enjoy together.
Splash park would be an area that we would be likely to use for our family.
Splash park Cricket can be played in an open field anywhere We are in Canada why not outdoor rink? I understand the demographic and all but seriously
Splash park, yes please
Splash park. We have kids and they would love a water park.
Spray park is really needed for the kids, specially in summer. there are bunch of cricket fields in NE but so far only one in west wind park. we really want to have one spray park in cornerstone
suitable for toddlers as well
Swimming pool
That way more people could come out and play cricket
That way most people with different interests can enjoy the space and can do various activities at one place.
The area is filled with new families and little kids, for a splash park we have to drive all the way to prairie winds, which is quite a ride, if we had a mixed amenity space close by it would be good for the growing families around
the city is in need of a full size cricket ground - mainly in NE area
The city is lacking cricket grounds and they are needed for the growing needs of the sports being adopted by Calgarians. Professional players and clubs will get the much needed space to play and practice the sport.

The city is vastly under served when it comes to spray parks and pools. Would love to see this be a spray park that had sand and water at it (city of Edmonton does this very well) there are a lot of families here that would use it.
The entire community can enjoy the facility
The idea of mixed amenity will give opportunity to all age groups to get best use of park rather than using the park for only restricted interest of cricket.
The kids will have somewhere close to swim. Prairie winds park is always so packed. We another splash park closer. And the kids love water parks
the large sports field would allow for more flexibility and both kids and adults could get a good amount of use out of that, the splash park would probably only be popular a couple of months out of the year when kids are not in school and it's warm enough to enjoy
The layout with multiple amenities will be better use of the space as this would have more to offer for the every age group and also people with different interest. Even though I am big fan of Cricket but I would prefer a space that has something to offer everyone in the community. This is the reason, I would prefer this concept.
The mixed amenity allows choices for its users rather than just a single option.
The neighborhood around cornerstone and within cornerstone itself there are a lot of new families with smaller children and I think having a splash park as well as a dry park would be a hit ! Especially with our hot summers.
The whole city is short of cricket pitches
There already is a cricket field in savannah /Saddletown area. No need to duplicate. A water park would be something new and beneficial for the area
there are 2 large empty fields and i have never seen anyone play cricket. Also cricket is able to be played in an empty field, might not be a cricket pitch, but it can be played. An AMAZING splash park with a playground will bring a large amount of diverse people and their money into the community for the local businesses.
There are a lot of kids in the community, and it is difficult to find parks and play places that are not over crowded. Having more of these spaces would be appreciated.
There are already enough cricket fields in the NE

There are enough mixed parks and multi amenity parks. Need more cricket only parks with proper cricket pitches so that cricket can grow in Calgary and more and more cricketers join the national cricket team in the future. The current cricket team in Canada is dominated by Toronto and Surrey cricketers.
There are lots of young families with children in the area. A splash park is the perfect place to hang out in during the summer to meet your neighbours and cool off. There's already a cricket pitch nearby.
There are many kids in the Cornerbrook Community. We lack amenities around the area for the kids.
There are more activities available for the community
There are no cricket grounds anywhere. Let the sport grow bigger.
There are no splash anywhere near north of Calgary. This would be great as there are many kids in the skyview, redstone and cornerstone areas.
There are no splash parks in newest communities near cornerstone. There need to be something fun for toddlers. Also, people will have more options in mixed amenity concept over one large sport amenity concept.
There are not many water parks close to our area. Kids of all ages can enjoy this in summers.
There are other large amenity areas planned in the community.
There are so many kids around this area and nothing close by for kids to enjoy and have fun. Splash park and multiple amenities will be great.
There aren't any cricket pitches in cornerstone or redstone, and due to the increase in cricketers in calgary every year, I think it would be a good option. Due to there being so many cricketers in calgary, the existing fields are always booked out in the summer. Cricket is also very common among teenagers now, just like me.
There aren't enough splash parks near by, so one in our community would be perfect for the kids
There is a new cricket facility not far from Cornerstone already in Saddletown.
There is a real shortage of cricket pitches in Calgary. Cricket is a great sport at bringing people from communities together regardless of their background.
There is a variety of sport spaces available everyone can try different sports (baseball soccer) and there is basketball courts in second concept
There is already a cricket pitch in Cornerbrook nearby to this regional park.

There is already cricket parks in the upper NE. We need more amenities for children and a splash pad is a more ideal with many young families in this quadrant
There is no cricket pitch in calgary NE
There is no single proper cricket ground in calgary
There is no splash park nearby for this region kids like Skyview, Cityscape, Redstone and Cornerstone.
There is no splash park nearby.
There is no splashpark or water park close to cornerstone and we always have to go to prairie winds and its always super crowded because its the only waterpark in the Ne area
There is not a single splash park in the area or neighbouring areas.
There is only one splash park in the ne and this is a needed amenity in the ne.
There would be a lot more to do compared to a large sports amenity. I feel like having that open amenity wouldn't be as shared as it would possibly be booked out for certain events, whereas the mixed amenity is open for everyone for all uses to be shared at all times.
There's no water splash around areas.lots of kids love it
These communities need for kids
This caters to a larger demographic variety than only to one specific group
This concept covers all age groups and kids will love this in splash park in summer
This concept gives a chance for the kids in the community to enjoy new and different experiences
This concept gives many options that allow people to enjoy different amenities meeting the requirements for most
this concept has got multiple things to enjoy as family.
This concept will actively engage children as conerstone is mostly occupied by young families with growing children.
This is good for all ages.
This is great for kids during the summer!
This mixed amenity's will serve more people with varied age group. Beneficial to all.
This Option Encourages Pepole To Vist The Park, Making The Community More Vibrant
This option is better for families

This reaches more demographics. This is a very family friendly neighborhood, and a spray park would make our area much more attractive and enjoyable during the summer. It feels boring and barren here right now.
This space would be more flexible for a variety of ages and groups. There are many young families in this neighborhood who would benefit from the use of a variety of activities as we are so far from other similar opportunities in the city.
This sport is growing at a fast pace..
This will be more usable for larger cohort of community members where Cricket is played only by 22 Players at a time
This will serve purpose for many people.
This will serve the community inclusively. And will provide support to the newer family in the community. Plus the kids will have a safe environment to enjoy during the hot summer days.
This would be great
This would be more useful given the majority resident are young parents and will have fun filled time with their kids. Parents can have leisure family time close to home without going heavy on budget and less travel time.
To promote and grow youth cricket and support the work Future Stars Cricket is doing.
Too many cricket fields in the NE
Usage by all age groups of community will be higher with cricket pitch as compared to splash park which caters to only younger residents.
Variety of activities can benefit the majority
Variety of options to do in the park
Variety will accommodate more of the people's interests.
Very few cricket pitch is available in Calgary and the community is growing
Very few options for cricket which needs to be encouraged more.
We already have many park with mixed amenities but we really need cricket ground as most communities nearby is south Asian and they love cricket it also generate interest on next generation into sport which could be beneficial for Canada overall Also it has multi use overall time with its open area availability
We already have one cricket ground in Cornerbrook
We already have one cricket ground in Cornerbrook
We already have other cricket space in Cornerstone, but we have no splash anywhere close.

We are missing it in Cornerstone
We are severally short on cricket pitches in NE
We are very short on cricket facilities in calgary
We can have a variety of different things. I know that there are not a lot of public pools that are accessible for people who can not afford an indoor one. Also a volleyball court in the NE would be very beneficial as much places don't offer a volleyball court (free or non-free)
We do not have a splash park
We do not have enough cricket ground in Calgary, you can also play other sports on cricket ground while the cricket ground is available.
We don't have a splash park nearby
We don't have close by any splash park
We dont a proper cricket pitch for our players in the whole wide province
We don't have any splash pad near our community. But we do have many cricket ground sites available.
we dont have anything closer in the area for kids and this is perfect for them
We don't have many splash pads for kids in NE
We dont have one close to our area
We dont have these in our area.
We have alot of kids, also it has amenities that everyone will use and enjoy, also this concept uses all the land and maximizes any dead space
We have kids and they would love it.
We have kids that would get better use out of Mixed amenity park
We have large playgrounds but don't have splash area fpr kids during summer.
We have multiple playgrounds but no splash park near by except for Prairie Winds Park. This would be a 2 min drive instead of 15 mins.
We have pitches in cornerstone, nearest splash park is in westwinds
We need a proper cricket pitch in calgary and NE is the main cricket zone for that
We NEED a splash park up here or a wadding pool there are so many children in the area (including my 5 kiddos). The closest one is in castleridge. Everyone loves a spray park ect and everyone in the community could use it where if it where cricket or sports field not everyone could use it as only certain ethnicities know how and play cricket and won't let others join. Same with any other sports field not everyone can play soccer or things like that and that is more age specific where as a spray park is for everyone no matter your ethnicity. We have enough sport fields around here including a cricket one just over in Skyview and soccer /. Football fields in all the school fields. We honestly don't need any more sport fields up here I say a splash park and in the winter turned into a skating rink or something

We need cricket pitch as they are are lot of children, teenagers and adults that play the sport. Spray park is not feasible due to infections that can spread easily
We need dog park for big dogs and for small dogs
We need more cricket field
We need more cricket grounds as the sport is growing massively in Calgary but not enough facilities.
We need more cricket pitches as no of cricketers growing in the town.
We need more cricket pitches in the northeast. There's not enough and most are always taken
We need more splash parks
We need outdoor activity for kids specifics from indian origin who are die heart fan of the game of cricket.
We need soccer play ground
We need to cater to a diversity of needs and wants
We prefer Concept B, because it can be use for multi-purposes. , not all people here are not interested or don't know how to play the cricket.
We prefer mixed amenity as people from diverse interests and age groups will be able to use it
We would want so a dog park for big dogs and small dogs to have a place for oir beloved dogs who we consider family too. A mini golf would be a nice addition to set it apart from other regional parks. Bike trails and beach or lake would be a nice spot during the summer for water sports for paddle boarding and alike
Will cater to all population from young children to older adults
Will give the kids in the community more to do! A splash park would be amazing.
Will provide more options to the community, not everyone plays cricket
Wishing more parks where we can recreative amenities such as volleyball, place where I can run and just enjoy. Almost like Stanley park around the NE area.
With Multiple amenities different age groups can enjoy
With the heavily populated area of NE belonging to Asians like residents from Pakistan and India, cricket is the best choice.
With the schools opening up in the area a field isn't as beneficial to the community as say a splash park.
Works for all ages, kids/adults.
Would be more fun especially for kids

Cornerstone Regional Park

Report Back: What We Heard

January 2024

Would benefit the community by bringing people who are interested in many things together. Mixed amenity's will incorporate more than one interest into the park.

Young families with little kids in cornerstone

Park 1: Court Area

Rank the following types of courts by preference. Drag your choices to the empty box on the right to sort them with most preferred at the top. Why did you rank these the way you did?

- Basketball court because we need more footballers to tackle us and help us navigate us to the NFL. Clearly I don't know much NBA, but that's the main reason. We might need to consider improving head knowledge by showcasing our cities citizens here in these improved courts. That's what I you love to see. Starts with me though being active.

- Volleyball is ranked #2 (preferably #1 I just can't put it against the sport that everyone adores more in the ymca's I visit in our city). Don't get me wrong. I love this sport.. man.. I say we need improved parks to accomdoate the lovers of our sport here and play on! Everybody else will automatically join wants it continues on. Thank you yyc.

- Throwback is ranked #3 because I am open to this idea because it is my first time noticing that it is significant. I like I just recently googled it. I am cocrned that the cost won't exactly profit or even encourage. I hope this works well though. Just be careful here.

- Tennis courts are ranked #4. It's because executing this will take seldom and indefinite time, but I am not a fan of it especially since I was not putting more effort to try new sports. Let's use what we have with and display athletes playing them enjoyable. It's always fun for me, especially when I was at prairire winds park NE! I played with fellow comrades who are asian decent! (Pls. this is not a racist comment thanks!).

-we need more tennis courts in the ne
-ive never seen a vball court in a community before
-bball is overrated

0 for all. I would rather have a dog obstacle course.

1 basket ball
2 tennis court

1. We have very limited/none Volleyball courts in and around Cornerstone, it would be a good hangout sport in the summer months especially beach volleyball will be a show stealer.

2. Tennis is an interesting sport and we have limited or no courts in the near vicinity.

3 & 4 really doesn't matter to me as most of the YMCA's and other sports clubs are providing those servecis. But Volleyball is something which we need to consider as that service is not provided in any Wellness Center/Sport Club

4-5 Tennis Rinks very good , Because tennis is more popular than all other games included.

A basketball court, tennis court, and volleyball court will cater to different ethnic groups who live in the area as well as guests coming from different parts of Calgary. An indoor basketball court will be great for all year round use
A cricket field as well as the splash park would be my pick but we need to mix up the amenities. There are far too many basketball courts and baseball diamonds.
A good soccer field would be the best choice which easily can be used for other purposes but options haven't been provided, there are already few basketball courts are available around the area, so it's the least favourite choice, same for tennis and throw ball, beach is okay but considering the weather of Calgary that's also not a good option but hard surfaces one can be converted into ice rink during winter time.
A large number of people have an interest in these activities.
A lot of family lives in this community and most kids plays with ball. Either basketball or soccer.
A lot of people can play volleyball together and anyone can play it .
A tennis court would be great because one I find they are few around the city, and not any really close by.
According to sports I like
Activities for youth in the area.
Again it comes to what will get used mostly basketball is one of those sports everyone enjoys. No need for any other equipment besides a ball. Then i chose tennis. Its classy and something for the adults.
Again, no nearby Tennis courts. And Tennis is an easy (and inexpensive) sport for people to get into. It's a fun family activity. Same with volleyball.
All are good, no pref
All the kids i know around the area want to play basketball 🏀
Already have basketball courts
Already number of basketball courts in area but none of the others in the area.
Already too many areas for cricket and there should be more tennis courts on this side of the NE.
Amenities ranked higher are those that don't currently exist in the area. Would be nice to see.
Any age group can play Tennis.
As a teacher in the area I have seen an overwhelming interest in basketball with not enough amenities to support it. I also believe basketball courts and volleyball courts allow for larger groups to engage in the activities as opposed to tennis where only a few people could engage. I think basketball and volleyball are better suited for the community
As I like games
As I see the kids playing
As in north east we have not many places to paly these sports activity

As per the priority of the community I believe
Based on available options nearby there are not many basketball courts nearby
Based on individual interests.
Based on most useful to less useful
Based on my interests and interests of people my age.
Based on number of people that play the sports
Based on popularity
Based on preference, all of them are good options.
Based on residents comments, feedback and likings. I want to be part of different amenities available in the park to keep myself healthy and fit
Based on sports interest
Based on the kids in the community
Based on what I believe would be most popularly used within the community
Based on what I see people playing in the area
Based on what I think is popular opinion.
Based on what sports I play
Basic necessary amenities
Basket ball and tennis court will be good options
Basket ball and volleyball are my favorite sport
Basketball
Basketball because you can play in small or large groups, then volleyball because I don't know of any other volleyball courts in the area, there are tennis courts at Prairie Winds Park which is not too far so I ranked it third. I don't know what throwball is.
Basketball can accommodate more number of people together. Also it is good in terms of exercise includes running, jumping and concentration on the Basket. 2nd Volleyball is my favorite.
Basketball can be communal. Tennis court could be used for a few different uses.
Basketball can be played with many people and also volleyball but tennis is more of a one on one sport
Basketball court does help.
Basketball court is already open close to this park with 4 courts so there is no volleyball court in area
Basketball court we already have nearby.
Basketball court would be lovely because asian people loves to play basketball court and there is no nearby basketball court here in the cornerstone area

Basketball encourages engagement with others to be able to play. It is one way getting to know others that live within or in nearby communities
Basketball is a sport most people play, it's more popular and easier to play, what I mean by easier is all you need is a basketball which people usually have, in contrast for Tennis you needs rackets and a ball. However, i enjoy tennis too.
Basketball is always alot of fun
Basketball is extremely popular in the community, all courts in near proximity remain packed in the summer
Basketball is life and volleyball us not a prioritized sport in the city
Basketball is most popular amongst adults and kids in area and beach volleyball is easy to learn.
Basketball is most popular here out of the four
Basketball is needed. The 2 large ones in Redstone and Skyview are full of teenagers and it's difficult for ages 7 to 14 to play as they are often bullied by the older kids. This would give more options and reduce foot traffic at the other sites
Basketball is preferred sports for youth born brought up in Canada Wherease volleyball is played by almost all first generation immigrants Tennis and theowball follows later cause in all previous communities i have lived in tennis court was almost empty year around
Basketball is quite popular in youth now days. It'll be easy for parents to promote physical activity in children with a court near by. Additionally, volleyball is a fun sport which all ages groups can enjoy.
basketball is the most commonly played sport in our community and so on. tennis courts are not widely available in the NE.
Basketball is the one I am most familiar with.
Basketball is very big in the NE, especially with the Filipino population. I think it would be great to have some basketball court similar to the ones in downtown with one in the Northeast. Volleyball would also be interesting outdoors as it opens more free opportunities. Tennis is a bit oversaturated over our city, and I don't know what throwball is.
Basketball is very popular and doesnt need a lot of equipment to but
Basketball is very popular with all ages. Tennis is also one of the popular game among young, middle and old age. It can also be used to play pickle ball game which is again very popular. And I assume volleyball is also liked by people at large.
Basketball seems to be a popular pick among kids, this also teach this sport to all in schools... so this would be a inclusive court for all.

Basketball seems to be more popular and requires minimal gear
Be used more this way for all
Beach volleyball is preference
Because around the Skyview, Redstone and Cornerstone area there are none of these which would make the park different and unique therefore being visited by more people. If you were to build a basketball court again it wouldn't be visited that much as there's almost around 12 13 or even more courts in Skyview , Redstone , cityscape and .
Because I think volleyball is awesome and we don't have enough of them in the NE
Because in this way i like to get part in different sports.
Because it will cover all age groups
Because its applicable to all ages. It will be a more enjoyable for both little ones and older ones
Because its better to play volleyball in beach it gives actual beach feeling
Because kids usually play basketball and tennis
Because kids will have fun and they like .
Because I love throwball
Because many people like to play volleyball.
Because most people here are more interested in these kind of sports
Because my kids love basketball and tennis
Because my kids play this sport.
Because there are basketball in skyview and no tennis or volleyball close by.
Because there are no tennis or volleyball courts near by at all.
Because they are in order of most physically engaged.
Because this large area are useful for our young generation and physical activities
Better for kids and community to engage
Better this way per the sports activity
Better usage for a variety of interests
Can be used for longer duration of the year.
Can play in teams . Less volley ball courts
Canadians are fund of playing basketball.
Children would enjoy this.
Chooosen as per preference.
Closest Tennis is either in pineridge or conventry hills. Having one is cornerstone would be convenient. Where as there are closer cricket fields (Saddletown, savannah area), so making more isnt necessary
Combination of youth, adult and senior citizens activities.

Communities in upper NE Calgary are severely lacking in options for courts. We have a few basketball courts, but no tennis or volleyball courts. Having a variety of options will engage more members of the community to utilize these amenities.
Cornerstone lacks tennis court provisions
Currently there are many basketball courts in the area and a beach volleyball court would be unique and add value to the community.
Currently, there is no volleyball court in the NE so it would be a great addition to the community
Demographics prefer that way imo
Different than other nearby parks
Does not matter to me
Does not matter to me.
Due to the usage rate by residents
Due to volley ball court not being available anywhere at all
Easy for people to participate
Everything should be included
Expand cultural diversity
First 2 are still not in Cornerstone.
For people they like tennis
For all age groups
For me and kids
From viewing what the kids like doing in the community
Good choice
Good sports
Having a Tennis court will bring out people who love the game and entertain themselves .
Having closer tennis courts in this area would be nice. We already have basketball courts in Skyview.
Heard kids looking around for basketball courts
I am a sports person as it will be very good for physical activity weather its adults or children.
I am interested in these games
I am not a fan of basketball or throwball.
I believe basketball is a famous sport among kids
I believe tennis would be Great sport among these and there are no tennis court in near by area .. it would help major ppl
I believe that basketball is a great sport for people of all ages to play, and is a very popular sport. I have heard from many people that Cornerstone would benefit having basketball/tennis courts.
I choose basketball because kids, teenager even adults loves basketball

I chose tennis for 1st place because tennis courts are very far from cornerstone, it'll be accessible for people who live in cornerstone
I don't care, and court would get used.
I don't know what throw ball is...
I feel Basketball court is a requirement in the community. Like our neighbourhoods, basketball is enjoyed and played by many.
I feel like basketball and tennis are more favored sports to play
I feel like we are missing a Tennis court and volley ball court.
I feel that a basketball court best suits the people In this neighbourhood.
I feel that is how they would be used by the public or residents of cornerstone
I feel that is the need of the area
I find these best in my favor
I have never seen a tennis court being built in newer communities and can only find them in older communities further south of us. Would like to see more young adults enjoy the sport, but unable to see that in Calgary as limited outside courts. Also it's expensive to go to indoor courts and can only see only high income family enjoying the game. Also for basketball court I find a lot more children and young adults enjoy it more compared to volleyball and throwball court. But would nice to see variety of these courts!
I know a lot of the kids in the neighborhood and everyone wants a basketball court. Volleyball and tennis courts will also be very popular but I don't know anyone that wants a throw ball court.
I like basketball
I love playing volleyball myself and there is nothing near by to play
I love tennis and basketball.
I love tennis. I would also like to play volleyball ball or do dome lawn bowling.. I am a senior and think that activities for seniors should be included.
I love volleyball and i think my friends also love to play volleyball.
I play basketball lots with friends and I think basketball would be a great addition and connect more people.
I play basketball regularly and would like to teach my son how to play the game as well.
I play volleyball
I play volleyball and tennis.
I prefer activities for fitness enthusiasts followed by activities for kids/elderly
I prefer cricket ground first after that is there any space for these game then anything like basketball 🏏.

I prefer volleyball and tennis
I preferred volleyball and basketball
I rank it how i like the sports
I ranked based on interest.
I ranked because those are the sports I play in that order.
I ranked in order of what I would potentially use. I like playing tennis and might use volleyball nets but the others not so much could be good when my son gets older though
I ranked it according to the games that I like playing and believe to be more accessible
I ranked it off of personal likings.
i ranked it with the most in demand sport
I ranked most popular sports
I ranked on the basis of my interest of in these sports.
I ranked them based of popularity and their likelihood of garnering people around the community to engage in physical and fun activities
I ranked them based on their popularity, and the demand for each one.
I ranked them because I think those are the things that are missing in the community the most and what residents will use the most in my opinion
I ranked these from the ones I enjoy most and the the ones people I know and hang out with enjoy most to least so if there was a basketball me and my friends would go more often than if there was a throw ball court
I ranked these in the order of activities I enjoy most to least and the activities I know my friends and family enjoy and play more
I ranked these this way as to see new concepts, that are not available at other parks.
I ranked this way because the first one will be my most favourite and the last one will be my least favourite.
I saw many people do outdoor volleyball, badminton etc in summer.im living in skyview since last 5 years .I'm visited chestermere in every summer for outdoor volleyball.
I see so many kids playing basketball that's why I ranked it as #1, the other 3 no reason
I think a beach would be so nice as there is only one in the NE area and tennis and basketball are popular sports.
I think a tennis or basketball court will be more usable during cold climate than beach court.
I think based on accessibility to equipment this makes the most sense to me.
I think basketball is the most popular among the generation and that is why according to the most popular sport I have done the ranking.
I think its easy to reach out for all age groups.

I think it's important for areas in the NE to have more than just basketball courts.
I think more people/kids could be engaged this way
I think tennis courts are really important to encourage physical activity in the community.
I think this ranking will be preference of most people
I used to have a tennis court close to my house growing up and would always play with my brother. It would be nice to teach my kids now.
I want a nearby outdoor court for volleyball. Tennis court because I can't find one near my location. Basketball court
I would like to know why there is funding for this regional park in the middle of nowhere, while Richmond Green Regional Park, inner city, densified area was SOLD to provide funding for its upgrades despite ENMAX having record profit to the city.
I would like to Rank beach volleyball as #1 it's my favourite sport, there's no other volleyball courts nearby and moreover even kids can play with sand and be creative while others can enjoy Volleyball!!
I would love to see a volleyball court, as I don't even know if this option exists anywhere in the NE at the present moment, I also would love to utilize tennis courts or badminton courts - I think there's a greater opportunity to have a multiuse kind of court and I'm not sure what throwball is so I put that as my last option.
If there is possibility to to have these all 4 sports Court will be wonderful,but if not then basketball and tennis courts will be must.
Imo order of least number of courts of these kind available as well as popularity
In Calgary, we dont often come across basketball courts. Thats Why I placed that as Number 1. The rest is just based on own preference when it comes to Sports.
In order of sport preference
In order of what I would use
in terms of popularity of sports and the courts that already exist in the vicinity
in this corner we do not have any good courts,and volleyball ball court is different.
Interest
Interest in sports
Interests
It fits my and my family needed and choices better that way.
It is what I see as what the community would use the most.
It will be the most useful.

Cornerstone Regional Park

Report Back: What We Heard

January 2024

It will bring the community together
It would be a great addition to have a beach volleyball court close to the pool and splash park to make it look like real beach
It would be fun to have a volleyball space as there is not one close by
It's basic requirements for everyone wants to see.
It's good to have different games around you
Its better
Its everybodys sport
It's just based on what I like to play.
Just my personal preference as well people I know
Just my preference.
just seemed right to me
Kids and youth needs
Kids can play in those areas
Kids enjoy doing outdoor activities right in the neighborhood instead of traveling to another community
Kids in my neighborhood usually play basketball om street which is not safe for them and basket ball is the second favourite games after cricket in my community
Kids love basketball and adults love tennis
Kids will benefit
lack of these grounds
Least popular to most popular in my opinion.
Lots of Cricket pitcher are me parks. Cornerstone doesn't have any basketball and tennis courts.
Lots of kids prefer Basketball and Tennis Courts
Lots of teens and children in the area who love basket ball but there aren't enough courts.
Love beaches and basketball.
Love tennis and there is no tennis court nearby. There is already a basketball court in Cornerbrook
Love volleyball and basketball!
Maintenance and cost of upkeep
Makes more sense to have courts first as these are and can be used for badminton as well.
Many of the kids in the area love to play basketball
Mixed amenity allows for all types people regardless of age to partake in activities
More common sports / my personal preference since I live in this neighborhood and walk around it almost every day

More engaging
More fitness and trees
More fun
More games that youngsters can be involved in should be provided to keep them off the drugs and streets
More kids engagement and per physical activity.
More kids will be able to play basketball. Bringing sports closer to them will build community gatherings amongst the kids and wither drugs away.
More likely to play
More likely to use them
More people are able to play together compared to the other sports where there would be more spectators and contention for play time
More people are interested in basketball please do not have tennis court it will sit empty
More sports can be played all around the year
Most accessible for kids, and most interest in these sports
Most common sports played for communities
Most common sports played. Can we done in small or large groups.
Most communities in the area has already cricket and football fields and as a observed in the houses in the communities kids love to play basketball as well so it will be good for the commnunity to have basketball courts as well and at the same time swimming pool during summer cause the swimming pool n prarie winds are always full during summer time
Most kids in the neighborhood have a basketball hoop at home. Would be great for all kids to come together in the community and share the love of basketball. Tennis and volleyball are also really great choices. No Idea what throw ball is. Another choice that is not there is cricket this should would of been second choice. I believe basketball and cricket would be great options for the community.
Most mixed use opportunities and organized play
Most of the children within the community will be interested in Tennis and basketball or Ice skating. This would be the better use of the faciiliteis.
Most of the kids play basketball in the areas around cornerstone
Most parks have tennis courts and basketball courts. I find these should be standard and added to the park.
Most popular sports in the community
Mostly asians in the community, so cricket and volley ball is great idea
Multi games option
Multiple activities
My family loves tennis!
My family loves this and fits our needs
My family prefer to time that way

My family preference
My favorite to least favorite. I would like to recommend if you can consider a big hill that can be used for sledding.
My friend and family circle have to travel every weekend to downtown (shaw millennium park), Airdrie or Chestermere to play. And we are not alone, we dont have any volleyball court in NE. It would be great to have something close to my neighborhood.
My husband and friends are always playing basketball
My husband plays tennis and has to go to other communities to play
My interest
My kids like to play volleyball but always go to the pumphouse or shaw courts. I would like to have them stay in our area. They also like basketball but not enough courts mostly at the schools
My own interest
My personal liking and popular interest
My preference of the sports I play.
My ranking is based on the popularity of the sport and wide acceptance. One can argue between Tennis and basketball when it comes to popularity but I think there is a dearth of Tennis facilities in the northeast.
My son loves basketball and I love volleyball
N/A
NA
NE doesn't have many of such areas.... especially fire pits!!!
NE is a vibrant part of Calgary with people loving Cricket / Soccer & Basketball
Need more basketball courts and tennis courts in the north east
Never seen in the Northeast.
No basketball courts in the community
No equipment required
No nearby tennis courts or volleyball courts
No particular order, I feel the basketball courts existing in this area are always getting good use.
No preference
No tennis court around the area. Can add volleyball court around tennis court.
No tennis court up here or beach / sand place
No tennis courts near by.
No tennis courts nearby
Not a lot of tennis courts in the area
Not many basketball courts around.

Not much volleyball areas would be different
Nothing specific.
Offers some more unique sports in the area
Only parire wind park have Basketball Kids like basketball and good exercise for kids
Only wanted tennis court actually
Pepole (Adolescents) will visit the park, also it helps deversify the amenities in the park.
Personal choice
Personal favourites
Personal preference
Personal preference
Personal preference
Personal preference
Personal preference
Personal preference and I know that is what most of the youth would agree with nowadays
Personal preference and the order in which me and my family would get the most use of the amenities
personal preference for sports
Personal sports liking
Pickle ball hybrid!! Please. Hard to find in the NE so we usually drive to the south or downtown, or even air dried.
PLEASE MAKE THE NETS A SINGLE RIM NOT A DOUBLE RIM
Popular sports
Popularity
Popularity/demographics
Practicality ang demand of sports
Prefer basketball
Prefer to see a volleyball court first
Preferance and likelihood of use
Preference
preference
preference
Put up a wall court as well for individual practice
Ranked according to sports I'm interested to play
Ranked according to what I think we have least access to in existing spaces.
Ranked based on my interests and what I think would be used more
Ranked based on my sports interest

Ranked in order of what I would use the most
ranked in what would be perceived based on usage. Tennis courts could be divided for pickle ball as well and has many other options for similar ball sports.
Ranking these based on enough basket ball courts. Need more volleyball courts
Required
Sandy area is best for play n for young kids sensory play
Seeing the different sports that the youth and adults engage in around the other neighborhood
Skating rink
Something different for kids and adults.
Team based sports make better use of designated space and involve more people simultaneously. Ranking is based on popularity of sports in my opinion.
Team sport creates camaraderie and basketball has been popular in Redstone and Skyview and not a lot of other courts like Volleyball and Tennis
Team sports
Tennis and basketball court could be used as skating rink during winter season
Tennis and volleyball are good sports,many people play those sports from N.E. Community.
Tennis and volleyball courts are scarce in this area
Tennis court is needed
Tennis court is something,both adults & kids can enjoy together.there is lack of tennis court in NE.it will be really great to have a tennis court in cornerstone,it's much needed
Tennis court is unique. Not all communities have tennis court.
Tennis courts and volleyball area are seldom seen in communities so it will be nice to have them here.
Tennis courts are not found in all parks. We need it to be known
Tennis courts can also be used for pickleball
Tennis is a great sport for keeping a very fit body and agility.
Tennis is a great sport that we all can participate in. Basketball is also something everyone can do both kids and adults. The hard surface volleyball isn't bad as well. We can use it more in the summer though.

Tennis is a great sport to cultivate here in Canada. Lots of skilled players and enthusiast who would like to play tennis and basketball but we only have limited space for tennis here in the northeast so definitely would go for these tennis and basketball courts.
Tennis is also good for pickle ball, and basketball is great for all ages and income levels
Tennis is an amazing sport for fitness.
Tennis is good working sports and I will active physically through this sport.
Tennis is my favourite sport
Tennis is played by most age groups. So would be beneficial to larger population.
That covers all age groups
That is my sports preference
The basketball courts in Skyview Ranch are almost always busy, and I would personally love a tennis court. The volleyball and throwball courts wouldn't get much use in my opinion.
The City could review the activity courts that are in the NE and decide which are in demand and where additional courts are needed.
The city has great accessibility to tennis courts but a good volleyball and basketball court are less easy to find. The interest in these sports is also evident when visiting parks and venues such as the Genesis centre. A good area for sports could go a long way in getting people outside and active.
The communities around LOVE the basketball courts there and then it was just based off of what I thought would be used more.
The game should include more people at single time.
The one basketball court in skyview gets crazy busy and in turn a lot of kids get bullied if they want to share the area. With having another basketball court it allows kids more spaces to play and less bullying.
The splash park is first choice of the grandkids. But the next are their choices. They live in cornerstone too
The top ranked ones would be less common than what is already around this area
There are a few basketball courts but not tennis courts. Hence the preference for something different for the kids.
There are basketball courts available in other communities close by (Skyview) and tennis/volleyball courts are not close by.
There are basketball courts in Skyview Ranch.

There are no beach courts in the area and only very small basketball courts. Needs to be well shared and not crowded
There are no beach or volley ball in the Northeast community.
There are no tennis courts in the vicinity, there are not volleyball in the vicinity either.
There are no tennis or basketball courts in the nearby park. It will be nice to have something like this in this park
There are not a lot of tennis courts around and tennis courts can be used for other requests sports like pickleball or badminton as well
There are not many tennis courts or volleyball courts around, so I think that would be amazing!
There are thousands of basketball courts all over the city but rarely do you find any tennis
There aren't many tennis or volley ball options in the NE
There is a huge demand for clean/safe basketball courts
There is a lack of Volleyball sites in the NE that is accessible for groups who play casually. There's not even one in Prairie Winds Park. Basketball is a popular sport amongst youth so continuing to have courts for that is beneficial to the growing community.
There is alot of kids in this area that play basketball. There are hoops on driveways around here.a skate park would also get alot of use or even a splash park. Currently we drive to Airdrie for those.
There is no doubt basketball is the most played street game, so having a dedicated court will help the players to practise
There is no place we can play outdoor volleyballs in NE.
There is no tennis court anywhere in the communities north of 84th street. We have to drive a significant way to access them. Also basketball courts are scarce, so many kids play basketball but the communities have limited availability.
There is no Tennis Court at Cornerstone, redstone, skyview, savanna. So I ranked Tennis at the top.
There is no tennis court in the surrounding neighborhood,adult & kids can play tennis together&there is high demand for this.
There is no tennis court nearby and is a need in the community.
There is no tennis court nearby in NE. Also basketball court in Cornerbrook park is very small.
There is no tennis court nearby not is basketball which leave kids with no option to play these sports
There is no volleyball and tennis court nearby

There is no volleyball ground in NorthEast community. City should give a space for this game. Tennis and basketball we already have quite good in numbers.
There is no volleyball or tennis court near by.
There is not any ground which is fully devoted to cricket in my area.
There is scarcity of cricket grounds in the area and city
There isn't any tennis court near Cornerstone and no volleyball court outside in NE.
There should be a big court with 3 nets each side same with the others
There were no parks around the area for basketball and a lot of families have to go to Prairie and Skyview which is already congested.
There's less tennis court in NE (near airport). No volleyball court in any NE park. Throw ball can be played by adult and kids. There's a lot of basketball in any park.
There's no tennis court around here yet
There's not much outdoor volleyball court in the city! Believe or not it's a big community. This is a great idea! This will be inviting to teens and will motivate them to go out and be more active.
These are inclusive sports for all races
These are my taste and even a lot of people will prefer same as mine.
These are the popular choices, residents want to use.
These ranking align with the kids of this generation to enjoy the hobbies they like to do
These sports are very important for the growth of our future generations
These two sports are most played, and every generation will have something to do.
They good for 5 to 13 years
Thinking of youth activities for modern generations.
This does not fit the immigration population in the area.
this is what people like to play in summer time. more engaged with community.
this rated based on the popularity of the sports
This seems more practical
This will make the part inclusive
Throwball court is last as there are little kids and growing families around, teenagers gathering here and might cause disturbance

Throwball court seems redundant. Volleyball court is pretty versatile - you could play tennis/badminton/other ball sports with just a net, so long as people bring their own equipment. Basketball is a close second after having a volleyball net installed since it takes a bit more space and is less versatile, but a popular activity.
To add much needed diversity to the current selection of courts nearby.
To be more active
To have more facilities with less cost.
To have tennis court here in NE
To offer something different to the community. A splash park with a beach-type volleyball would resemble the infrastructure from a hotter place down in the Caribbean.
Top ranked ones aren't seen as often as other options
Use by family and friends
Very few public tennis and volleyball court in the north east. Already lots of basketball court.
volleyball as many people can play
Volleyball court is missing in NE
Volleyball courts number one priority there is no current outdoor public volleyball courts in the NE and it is needed!!
volleyball is the most fun
We already have other basketball courts nearby. Tennis and volleyball would add variety.
we also need a badminton court
We dint have tennis court nearby
We do not have a tennis court
We do not have any Tennis Courts in the New North East. This would be a valuable addition that would be used by multigenerational users.
We do not have any volleyball courts in the NE and I know that a lot of people would benefit from it.
We don't have any tennis court in NE
We don't have any tennis court in north east
We don't have tennis courts up here that I know of I ranked in use of our family
We dont have volleyball/tennis courts in nearby parks. Bastetball courts are widely available in almost all the parks
We got no tennis in the area.
We have basketball courts already I. The area but not the others.
We have no tennis courts and plenty of basketball in the community.
We have shortage of these fields in north east.

We need a dog park
We need a round cricket pitch and a jogging track. There are lot basketball court nearby...so need something new like Tennis court, long jogging track, picknic spot..etc
We need basketball court around the area
We need more basketball court in the city.
We need more basketball courts for our youth to stay active
We need more of this around the city
we need more tennis courts in the NE
We need more tennis courts in the North.
We need one sport
We need some activities for kids and adults too
We need to build more tennis courts in the Upper NE. A lot of residents from these communities travel for at least 12km just to play tennis. At least 4 tennis only courts should be built in this regional park. Build a separate pickleball court, 1 is enough, max of 2. If you plan to build a volleyball court, it can be mixed use with badminton. Badminton isn't really good to play outdoor because of the wind, Calgary is windy. Badminton is better played indoor. Basketball is always popular too. But there are already basketball courts and cricket pitches in the communities here. So, tennis courts are the priority here. A hockey area should be added too, surprisingly a lot of kids, teens and adults of all race and color play this sport. The basketball courts can be turned into skating rink in the winter, a safe space for everyone to skate and not get hit by a puck.
We want small ground not cricket ground
We would like cricket as lot of us enjoy playing cricket and it would be nice to have a splash park for kids as it is growing community with small kids
With multicultural community in this quadrant, from given options, this would be appropriate to match the interests of majority. A lot of potential for training new and youngers folks to get into these games with use of spaces will come in handy.
Would request to have all 4 courts since in NE cityscape, skyview and cornerstone communities, non of these facilities are available and we have to go to prairie west wind or NW for these sports activities each day during summer.
Yes
You don't see volleyball courts too often, so they get 1st. Basketball courts are common, and a staple , so they get 2nd. (Most people play volleyball+basketball). Tennis is last because not everyone plays, and it has small team sizes.
Youth love basketball

Park 1: Additional Amenities

Q: Rank the following amenities by preference. Drag your choices to the empty box on the right to sort them with most preferred at the top. Why did you rank these the way you did?

<p>#3 for me is firepit gathering place. How do we distinguish between when is not safe to have firepits internally in our neighborhood like in the martindale or taradale communities? It's because back in my home in the Philippines, my manongs had a fire and allowed us to cook our pigs. It was for a wedding. What if that could be brought here to Calgary, but from giving standpoint? Not my strong suit, but I hope our cultural differences commences rapidly.</p> <p>My #1 ranked is here is playground improvements. So better backgrounds for schools to take photos and post them on billboards to celebrate is immaculately strengthened from out city. Also because if we can have better theme park catered towards this playground reminds me of the praire winds park or the calaway.</p> <p>#2 is outdoor physical activities because vancouver in up there in physicality. This inspires our people to join outside. I remember a conversation with a cousin of minds.</p> <p>#4 iq flexible lawn. Everything is needed and can be done here given our city needs more manual labor. I am wondering though.. this invites a scenic theatre of our city. A film needs their location anyway lol.</p> <p>#5 and #6 are outdoor grilling areas because family comes first. Logically, improved parking might be needed. and #6 tandoori/pizza oven. I want this up the ranks somewhere, but I can't figure out any emotion to this. That does not ever matter since we're beiong completly logical, but that's why I need to research what it offers, off. the. bat. Thanks YYC.</p>
<p>1. Firepit Gathering - I have seen this in SE Mahogany. Its very useful in winters.</p> <p>2. Lawn area - Should have this type of concept. Its its like how we have in Westwinds Praire park where we can site, bike, jog, walk, then good to have.</p> <p>3. Playground - Not sure if its just for Kids or Teens as well. But if its for all ages then it makes sense as small playgrounds are there in every community</p>
<p>1-Outdoor fitness is must for people going for walk and will be popular spot</p> <p>2- playground for kids is always needed around community operational year around.</p> <p>3- tandoori pizza is new concept so i prefer it above outdoor grilling area</p> <p>4- outdoor grilling area is good to have</p> <p>Sounds like small picnic in evenings and weekends near house</p> <p>Outdoor fire pit and flexible lawn follows next. both these amenities should have big shade areas so that its enjoyable in summers.</p>
<p>1st thing is Kids area is utmost important for kids during summer time. 2nd, Outdoor fitness equipment are usefull for Youth, adult and Old age equipment to engage them with physical workout. Firepit gathering spaces is best during winter time.</p>
<p>A big off leash fenced in dog park is the only thing I would like</p>

A firepit gathering place would add a nice year round space for users. Additionally, flexible lawn area is always welcomed and would add to greenery and longterm mature tree canopy in the New North East. Other nearby parks have a few of the other amenities. Also worthwhile considering a mix of a couple options here as well depending on the size of the site.
A firepit sounds fun as does the outdoor fitness equipment.
A fireplace would be great for the winter time. Outdoor grilling is also great for gatherings and having a grill outside if they could not afford a portable one. Flexible lawn is for just in case the place can't set up permanent nets (volleyball, badminton, spike ball) they can bring their own net and set up their own games.
A flexible lawn area would be great for picnics, lawn games, general gathering. An outdoor grilling area or fire pit would lend to that as well. A playground is good cause there are many kids in the area but there are many others available already. Tandoori or pizza oven is too specific and not as many people would use that.
A focus on spending time together, and activities that a large group of people could enjoy.
A good playground always brings families out. It's good to have places to cook. Never see many people using the outdoor fitness equipment in parks.
A great way for the kids to unwind, as playgrounds are always so full in cornerstone and exercise is a way to stay fit.
A lot of children live here, the playground is necessary. The firepit would be nice to gather around. Everyone wants to grill (the grill area). And the flexible lawn area gives options to do as one pleases. The fitness park and oven are just not something I'd personally use, but they're great ideas.
A lot of us in the community have seniors living with us who just walk. It would be nice they can try other things/equipment
A nice large playground would be great!
A place for The kids to play is for sure still too priority, this is a big factor for their growth and Development. 2nd is The outdoor exercise equipment, to have the chance to exercise outdoor with The Nature and have some fresh air with impact the surrounding residents in the community and specially the elderly. The rest are Good for gathering specially at the summer season.
A playground would be perfect addition to pool area and beach volleyball court. Northeast area has a lot of kids and they need this kind of facilities that are close by.
Access to grilling or ovens would be welcome, as all the parks that have these amenities seem to be far from this area, but we can see lots of kids in the area that could use the other amenities.
According to community needs
according to interest
According to me most people and me wants the same
According to the needs of the area around the corner stone

Activities first after relaxation and space for elders to come and hang out
Add mini golf to make the park unique
Adults need more exercise fire pit is relaxing and more playgrounds for kids is never bad
Again just seemed right to me
Again options for fitness should be available followed by joint gathering activities
All cannot afford a gym. Children loved swings. Small gatherings with family and friends nearby the house.
All idea is awesome but I want to prefer like this because these all are not in our community
Allows more freedom and personal choice. Fire pit and oven would be over used and not well maintained
An open fire pit and oven would invite the possibility of fires and with no supervision, this could be detrimental to the housing.
An outdoor fitness area would be very nice, because I haven't seen many in Calgary. Matter of fact I saw quite a few in Vancouver and was inspired by them. I feel like all of the others could be ranked equally.
An outdoor playground or excercise equipement are best for the people in this area. So many elderly people spend time with their grandchildren at the park.
As a family , more play area for kids and bbq
As I mentioned, this area needs well planned area of gathering for families, so a grilling and picnic area will be great to have.
As per interest
As we know here in calgary we get severe winter weather so i will prefer more to firepit gathering space where we come and get a chance to socialize with others.
Asked my kids and they picked this
Avoiding potential fire hazards. I would prefer a large space for family, community, and neighbourhood socializing or bbq would be nice.
Awesome playground is 2nd most important to the splash park
Barely anything to do around the communities on the weekend. With this people can have picnics, celebrate events outside given the space and amenities

Based of pervious parks, I feel a pmay ground is needed to allow kid and or families to come together and play. However, an outdoor fire pit would be the first of its kind so it'd prevent more of a physical appeal to the public and community and thus setting the mood for a beautiful date site, or an area for nature lovers to go hang out with friends and just have fun. And outdoor exercise equipment would not be taking seriously as many do not jnow what they for or simply can't go when the weather is hot and nice as those hours are usually spent indoors working, a pizza would be a first of its kid as well but presents lots of dangers to community as kids and teens would be more likely to fool around which may cause an accident or fire if not supervised 24/7
Based on Community demographics and needs
based on my preference
Based on need in the community
Based on personal and family interest
Based on personal interest and activities I would like to do in the park.
Based on the activities
Based on usage of the community. No one will be using tandoori oven on daily basis. But will use fitness and play ground
Based on what I think would be used more
Based on what i think would be used more
Based on what I want
Based on what people would use and enjoy most
Based potential usage rate by residents
Bcoz of kids
Because I believe my ranking is upto priority
Because I did.
because I think this will encourage people to use the space more then just having a kids park
Because it appeals to wide variety of people
Because of the high population of children within the community.
Because on weekends we go outside and want to cook something and got hot Plat
Because relaxation and health related
Because that's what I would prefer to have. cornerstone does not have an outdoor fitness place where the community can come together and be active.
I put the flex lawn area as second as there are a lot of dogs in Cornerstone. Every 2nd house has atleast 1 dog. Therefore I would highly appreciate it if we could get a dog park that is fenced and where we can let our dogs place unleashes as now we have to drive atleast 15 mins to go to a park!
Because we don't have enough parks in the neighborhood specially in Cornerstone is we just have one and it's far
because you can have gatherings with family or friends
better flexibility for Usage of groups in the area.
Childgrbs smdnities should be first.

Cornerstone Regional Park

Report Back: What We Heard

January 2024

children and exercise
Children need these areas.
Community sitting area and community grill seems like a good idea
Considering all age people and more activity
Considering the weather conditions and beauty of the neighborhood the rankings were given. 1. Firepit gathering will be good hangout place in winter evenings. 2. Outdoor Fitness will be a good option for summer evenings and early mornings. 3. Outdoor grilling area is a good option for small gatherings especially for the neighbors. 4. As cornerstone is mainly occupied by Children, it would be a good option for both children and Parents. 5 & 6 options doesn't matter much to me.
Corner stone have only one playground
Cornerstone is young. Kids need playground. Outdoor grills would be use full for multiple groups while tandoor over would be for one group of population.
Diversity
Dog Park !
Don't have kids so more adult interest
Due to shortage of playgrounds, outdoor grilling areas and outdoor fitness equipment. I see not too many people using the last three amenities.
During summer time people are looking for outdoor space to spend with family and most of the prks are always full so it better to have the hese kinds of amenities in the community
Easy to do stuff with family.
Elderly need some where too
Elderly people and children can enjoy outdoor activities.
Everyone can use fitness equipment
families should stay active together.
Families were encourage to do excercise and for healthy lifestyle
family and kids are most important, tandoori is an acquired taste
Family gathering for outdoour
Family oriented. Empty open grass will invite dog owners to ruin the area.
Family will love this
Fenced Dog park!
Fire pit and grilling area would be awesome for the summers for all ages.
Fire pit and places the cook outside would be great to get out of your home and explore the neighborhood. Also can't go wrong with a playground and flexible lawn area where kids and families can gather.

fire pit gathering space is fun for families to spend time together. tandoori oven is unique idea but how people know how to use it. outdoor fitness can be fun for all ages.
Fire pit is number 1 as we have long winters and it's great to see the community come together even in colder climates. Outdoor gym is something that Redstone has and a lot of it!
Fire pits are a great way to gather and even meet new people
Firepit and outdoor fitness area are good for people to enjoy.
Firepit would be unique. Playground that caters to more young kids would be fantastic. The ones that exist are overcrowded.
Fireplace is great during winter specially when taking walks. Outdoor fitness for healthier community and cheaper options instead of paying for gym
Fit community means healthy and happy community.
Fitness and playground to keep active
Fitness and playing area should be the priority.
Fitness equipment is good for all ages and can stay active. Playground for kids. Gather fire pit for more involvement within the community during colder days. Flexible lawn for walking dogs are playing catch. Lower interest in outdoor cooking as will increase garage laying around if not managed properly.
Fitness is important but not everyone can afford gym membership and here parents can also take kids along without worrying about who to watch them when they go to the gym. A flexible lawn area is multipurpose depending on individual preferences
Fitness is important for all walks of life
Fitness is my number 1 priority followed by park for kids, as Cornerstone is very family oriented community. If we make outdoor grilling area that will also bring issue of drinking alcohol in public space and this will be a headache for police and peace officers. so we should avoid outdoor grilling area in this community.
Fits my needs
Flexible lawn area will turn to a weed filled lawn. It will be nice to have an outdoor free gym and a playground for kids
Focus on the family or gathering of groups.
For a change of outdoor exercises
For all age groups
For everyone and mostly kids and toddler can enjoy
For gathering , for all age enjoyment
For gathering and walking. Its better
For kids
For kids to have something to look forward after school during summer

For me the design of any facility's top priority should be the children. The reason being that, I believe children are the ones who enjoy any facility the most. Next up is the family and friends so having a grilling place encourages relationships to grow. With obesity becoming a global problem, exercise equipment needs to be one of the highest priority's for any government. Fourth is the green space. The current climate crisis the world is dealing, maximizing green space is crucial. Green space can be enjoyed equally by all different socio economic groups. I personally discourage places which are limited in size (oven, fire pit) because they can be easily taken over by a small group of people thus discouraging enjoyment by all different groups. Complimenting green spaces with lot of seating should be considered.
From most to least enjoyable.
Gathering spaces like firepit and grill areas will bring larger groups of families and friends with a clear purpose of enjoying the provided amenities.
Gives flexibility
Good fun time for parents.
Good in summer
Green space is very much in need in the NE as it has lowest amount of green space across the entire city. Grilling area allows for people to get together and meet and have a picnic. Playground for kids is almost always a good idea for families with children.
Grilling and firepit spaces are ideal for communal get togethers and have a broader appeal among multiple demographics. Playgrounds and fitness equipment in the park are a good area of focus for public health initiatives.
Grilling area and tandoori oven are nice ways to allow for family activities for all ages. Playground and outdoor fitness should be ranked the same, one is for kids and one is for adults. A flexible lawn area seems like a waste.
Have kids
Having a designated outdoor grilling area reduces the risk of fires in the backyards
Having a gathering place for family is essential
having a park in the area would be beneficial for many of the children and families in the area
Having multiple grilling area is better than having one huge gathering place. Lot of young families have their parents living with them, so outdoor equipment will help them to stay active and social. Playground is a must to have in a big park.
Having playground will be encouraging for kids and with large shaded seating spaces will be a comfort to our elderly to enjoy leisure time.
Healthy lifestyle
how much the community will use them/find them useful. demographically speaking

I am into fitness and staying active
I based it on my personal use preferences. An offleash dog park would be my true number 1
I believe a playground is essential for children and nessecary for parents to attend to with their children for growth. Fire pits and grill areas will be beneficial for outdoor events and bigger gatherings for community events.
I believe we have enough playgrounds throughout NE so we should bring up new concepts to develop the city.
I believe we need a dog park
I chose flexible lawn area as I believe this makes the most sense from a usability standpoint. The pizza oven is strange as how do you even set that up for usage (first come first serve would hardly seem fair, and the booking and administration of such an item would add too much complexity).
I chose it based on what the community would like.
I chose outdoor fitness equipment because it's it can be useful even if your just walking you can do some fitness.
I don't know how people would share a tandoori oven. I see many outdoor gyms in Canada that are never used. I see packed picnic/BBQ areas all over the city.
I don't think a fire pit or outdoor grilling area would be fitted in these spaces. It works in the south, but for the north, there will definitely be misuses of these if not monitored. Playground and an exercise equipment is needed as we lack so much of these play spaces in our northeast communities.
I feel it would be highly beneficial for a park as many kids would utilize it.
I feel outdoor grilling area, lawn and playground are very important for someone to spend time in there. It caters to alot of people.
I feel outdoor gym and children's playground are the 2 most appropriate options to consider, they both promote fitness
I feel the options I chose fit better with my and some other families around in the area.
I have kid and he would love this
I have no preference on this option.
I have ranked according to the preferences of the community as I think there are lots of little kids around the cornerstone community, and we do not have sufficient playgrounds for them so that is why I have started with the playground and according to the popularity I have tried to rank.
i like it
I ordered it in the order that I think our community will benefit from the most
I prefer open spaces. Some amenities could be vandalized or abused.
I prefer this way according to community members needs

I ranked because when go to any park, I look for that first
I ranked in the order that I believe more geared towards my interest and most people in the community
I ranked it by mostly ideal doing by families during gathering and what os most enjoyable
I ranked on interest. Walking trails would be my ultimate choice.
I ranked tandoori/pizza oven last because I don't think people will use that much. I love the concepts of seating/gathering area which is why those are first
I ranked these in the order i would be more likely to use.
I ranked these in the things I would enjoy to do most or least and where I would spend more time
I ranked these in the way I would use more and things I enjoy doing more as well as my family and how often we would use it
I think a nice built environment is better than a huge lawn.
I think a pizza / tandoori pit is absolutely the worst idea. What do everyone can fight over who gets to use it at anytime that's just asking for a lot of problems in the community And as for a bbq area that's also not good since no one around here can clean up after themselves and on top of that there is already enough horrible cooking smells in the area. That will just add to it drastically. Not everyone can stand the smells of curries etc and makes it not far to the community as a whole
I think more people gonna enjoy outdoor grilling
I think we have more than enough playgrounds in the area and the need for other amenities is greater.
I usually had to travel long distance to enjoy water play ground or to enjoy outdoor fire pit
I want my kids to enjoy
I want to be able to have barbecues and picnics and to access fitness equipment.
I would like to know why there is funding for this regional park in the middle of nowhere, while Richmond Green Regional Park, inner city, densified area was SOLD to provide funding for its upgrades despite ENMAX having record profit to the city.
I would like to see tandoori oven because there little Then there already a lot of lawn area and playground good for kids Fire pit good for summer Grill good year round
I would use these amenities more.
If the proper amenities are in the park, Pepole will visit it
In order of personal interest

In these areas there aren't enough playground for kids, even those which are available very poorly equipped so we need an inclusive playground like south glenmore or north glenmore area,outdoor grilling area is another good options as these areas do not have enough outdoor grilling areas,flexible lawn area can give some openness and can be used for various purposes like picnic,sports,or a community program
Inclusive for everyone.
It better
It gives us more time to socialize with people of community
It is nice to have an outdoor time with kids doing bbq without going too far from our community
It is suitable for kids,youngers,senior citizens.Thanks.
It provides more options all year round
It will be good who children, adults, and senior person too.
It will be helpful for walk, for kids activities and for adults
It will let families sit and spend time even when its cold
It would be best for the fitness areas to be around the walkways and also there should be 3 big playgrounds connected to each other
It would be nice for families to be able to gather together and BBQ and or sit around the campfire
It would be nice if we could get all these set up for only 1 reason so that anyone who visit this park would have a good time!!!
It would be nice to have an area where people could have gatherings potentially birthday parties as currently there's not much for areas up this way that can be used for birthday parties/gatherings
It's always beneficial for kids and families to come out and enjoy the nature . While kids can enjoy the playing activities while parents can look after them once they are out from home to entertain themselves .
It's always good to various amenities in the neighbourhood. We don't have anything close by.
It's convenient for adult and kids alike to have these activities in order.
It's important to have a place to have kids social events
Its best to add more playground as the community have a lot family woth little kids.
It's important for adults to model healthy living for their children. While adults use the fitness equipment, children can play at the park. The grills would be great for birthday parties.
Its more important
Its my personal choice
It's what is needed in the area

Judging by the community, this will give them options. I don't think there are tandoori grills anywhere. That would be a first as far as I know. But again, this is my preference and I am sure the community at large will enjoy anything that is finalized.
Just based of the population of the community there are lots of kids and families who would benefit from the playground and everything else
Just my preference
Just personal choice.
Keep people active
Kids don't have much to do in this area, they must be the priority. An outdoor gym would be great to finally have a reason to walk around the community. And the other spaces go towards meeting places for families.
Kids playground and grills great combo for a family heavy area.
Kids prefer
Lack of gathering places near by location
Large play areas are needed for a more variety of usages
Like flexibility and picnics
Looks good
Lot of South Asian live in this area with lot of Seiors and Kids.
Lots of children in the community and not enough parks. Gathering areas are nice for casual hang outs. Flexible lawn area perfect for misc. other outdoor activities.
lots of families in the area
Lots of kids wants playground and adult can exercise on fitness equipment
Lots of playground and open grass areas but no grilling or food cooking gathering areas in the area. This would support apartment and condo complexes with no bbqs allowed and support gatherings.
Lots of room in lawn areas. I don't think many people would use the pizza oven for sanitary reasons.
Lots of young families in the area with small children
Love a place for gathering with friends and families
Love the fire pit concept but grew up in a neighbourhood with a fire pit that was literally never used once. Would prefer amenities that are accessible on a daily basis by multiple people
Many multiunit homes in area my ranking prioritizes space those folks may not have access to the
More communal amenities for such communal cultures within this area
More people can benefit and stay fit. Cooking can be done indoors but not physical activity.

More people can stay active
more practical to least practical
More Senior and young kids needing those
More use to me
Most useful
Most useful at the top.
Mostly new family with kids.
Multi purpose
My family loves bbqs and sitting around firepits.
My family preference
My first preferences is fitness followed by outdoor grilling area so that we can improve fitness and also do team meetings over the grill. Rest are not very important
My own interest
My personal favourites
N/A
Need a massive quality playground jn the community.
Need more community areas not open green spaces.
Need more grill/community fire places in the area. Imagine being able to make a pizza in the park?! Already have playgrounds and schools.
need more tables for seniors to sit and gossip
Need place for fitness activities and lawn area for adults. There are plenty of playgrounds.
Need safe spaces to incorporate grilling and fire pits
Need to have these places where the community can come together and have picnics, there are parks otherwise but none have cooking pits or grilling stations
Never have time for the gym so outdoor would be great with a near by playground with the kids to play while I workout
Never used a tandoori oven, intrigued to try. Open space and outdoor grilling area would be nice in the summer and close by.
Nice to have get together with friends and famiky
Nice to have parks to have picnics
No large fire pits anywhere in the area. Makes it year round accessible. Playground or splash park would be used a lot.
No one ever uses outdoor fitness equipment. A huge waste of money and space. Also, a pizza oven?!? No way. Ugh. I can't imagine that being clean. Playgrounds are always a plus for any park, and nearby grilling would be great for the adults supervising the kids at the playground.

Not about ranking, but it would be really great if there was large walking area in the park.
Not as many grilling spaces except prairie winds we need more spaces where families can gather which involves food. Food is a big part of our culture here
Not everyone living in area is of Indian descent, but we do have many older people in the area that could benefit from exercise equipment and parks are always welcome as we only have one in the area. Fire pits, aren't they a hazard especially since we have so many individuals who like to set off fire crackers/fire works
Not to keen on things being fire accessible near my home.
Nothing beats a firepit in this cold weather!
Old people can use the fitness equipment with out going in the gym . Not all of them can afford gym fee.
one of the great things about Australia is that their parks have bbqs and eating areas for people to enjoy the outdoors. we need more of these
Only other park in the NE with outdoor BBQ is parire winds which is overcrowded, need for a new park with similar amenities.
Open areas to gather in a group is nice. Having an option for bbq is also very cool. But a tandoori pit again is not something everyone may use and I worry people might misuse nice things.
Open space would be great for just playing around with other non equipment games
Order of what we'd use more
Other parks very far
Our family loves this and fits our needs.
Outdoor cooking area is nice but people will hog over these areas. It sounds rude but it is true. Please provide different amenities.
Outdoor cooking could be good for the community, and hardly anyone uses the outdoor fitness equipment we already have.
Outdoor equipment and flexible lawn area will help people stay healthy specifically older generation and young children can utilize the lawn area and outdoor playground.
Outdoor exercise is a must for those who can't go to gym and need just a little bit of workout to stay healthy. Also it's great for parents to see there kids play and do some workout for there well-being.
Outdoor fitness and having a playground is a win win situation for the community as whole an wholesome fitness for everyone. Outdoor grilling is a great idea for families to get together in summers for picnic. Flexible lawn will give a great options for kids and people to play and explore many different activities.

Outdoor fitness equipment helps those who don't have the funds to pay for a gym membership as they are expensive. This can help youth who don't have jobs yet or elderly folks who want to continue staying active.
Outdoor fitness for old and young prioritizd
Outdoor fitness ranks number 1 to have more accessibility to fitness for the the community and it is valuable to have one outdoors since Calgary has plenty indoors and our winter season is long so this will encourage more outdoor activities in the adult community and essentially more sunlight and fresh air for overall health. Also the outdoor grilling would be great because we wouldn't have to travel far to have this time of space since we are located on the outskirts of Calgary. The tandoori pizza oven is unique, attractive and adds value and fun.
outdoor grilling area can benefit more people
Outdoor grilling area encourage families to gather in a safe space. The only thing is that if it's not monitored then people would abuse it.
Outdoor grilling area will be great idea for friends & family to gather,have picnic during summer
Outdoor gym is not common in this area
Outdoor picnic with family, gathering, children fun time and something pretty exciting about Pizza oven.
Outdoor sitting area is much needed so people can spend time with their friends and family.
Outdoors are absolutely needed after a long cold spell. Grilling is a great outdoor group or independent activity. Followed by kids having a nice playground makes it super attractive. Outdoor fitness is a great concept to enjoy outdoors at the same time. Fire pit is excellent to enjoy the spring and fall and late evening in summer.
Park Area A concept 1
Park is specially for kids they want id they are happy that will happiest thing for parents
People can come here to enjoy small family gathering like picnic
People can relax & enjoy bbq during summer,grilling area would bring more people here.beside this,having playground,outdoor fitness will be cherry on top.people in all ages will get the benefit
People will love this ranking
People would definitely love these idea.
Personal choice
Personal choice
Personal preference
Personal preference
Personal preference
Personal preference
Personal preference and because I have small children

Physical activities for kids and adults are important. A gathering pit will be nice for bondings.
Play
play area for kids
Play area that is both child and adult friendly will promote visitors. A space for gathering will promote community cohesiveness, detailed amenities is not needed. Bowness park have served so many people without the hassle of having extra detail.
Play ground
Play ground and outdoor fitness area will be fantastic for the community.
Playground a big requirement for kids in Cornerstone and so as Fitness equipment to benefit everyone.
Playground and Fitness Equipments are important for Helathy Lifestyle
Playground are always filled with children. So it good to see rush in park . Outdoor grilling area if comes with table is also good . Tandoor or pizza oven is useless becoz no body will prepare food or pizza there .
Playground for kids and fitness equipment are must
Playground for my kids
Playground is a must, there is not one play area around this neighbourhood that kids can go to. Fitness facility will be good as almost 80 % of the families here have elder parents living with them, this can be something to keep them active instead of spending money in facilities
Playground is a must. Adults love the exercise equipment. Bbq/ firepits are a great addition.
Playground is more important than other recreational things
Playground is must for kids and so is outdoor grilling area which is absent in this part of city
Playground or fitness
Playgrounds and picnic areas would be wonderful for kids
Playgrounds are important for kids to play in. Fire pits can be great for the winter, when people might be more isolated by staying at home more. Outdoor fitness equipment also encourages adult physical activity while removing a financial barrier. Lawn space is still important to space things out and let people have a space to just chill. The last two don't seem necessary.
Playgrounds attract kids rather than adults
Please include option to xcs in winter. No fire pits or fire. Common sense is not common.
Please make small long jump sand court , that can move people towards fitness.

Please.. we definitely need this outdoor fitness equipment. The more equipment the better.
Prefer the open area and gathering space to sit down
Preference
Preference
Preference
Preference to better space diversification
Prefre fitness first
Ranked by preference of amenities
Ranked for a reason we need more
Ranked in order of what I would use the most
Ranked in order our family would use
Ranked it in a manner that bigger groups can comfortable sit across and chat/enjoy. Playgrounds are prevelant everywhere so ranked it lower. Very few people use out door fitness equipments
Ranked it these way according to what everyone (not only to one ethnicity) can use and enjoy. Every culture and ethnicity, race and color can use the fitness equipments and playgrounds and flexible lawn area and grilling area.
Ranked them according to the usage in all weather conditions.
Same I believe as per priority
Seems logical to me.
Since these are close to communities I don't see a use for BBQ a fire pit would bring everyone out to enjoy our gorgeous nights!
Space for everyone, including kids
Staying healthily, get together, kids play, with winter being longer, shorter summers
Strictly for use
Summers are more fun with the top ranked amenities
That covers every age of people.
The communities around here have lots of kids and playgrounds are always in use. An open field for sports of all kinds are in short supply.
The fitness place will benefit everyone
the kids need a bigger playground
The outdoor fitness equipment can be used by all ages.
The rankings is more family friend
The top ranked amenities will be the most beneficial in my opinion.

The younger generation and family should be priority. Hence the playground, grilling area, and firepit ranking top 3. It promotes activities that a family can do together. The lawn is supplemental to the grilling such that it can good spots for picnics. The outdoor fitness is a playground for adults, and tandoori /pizza oven seems to specifically cater to the South Asian communities there.
There are a lot of you children living in this community and they should be priority. Outdoor fitness area will be a very good addition that would give residents an opportunity to stay healthy. Basically I tried to rank them based on the optimum use of these amenities.
There are alot of kids in the neighborhood and not enough places for them. Also need a dog park
There are lots of kids in the area, so a bigger playground would be great. Also the flexible lawn affords us the opportunity of holding picnics in summer.
There are many families with young children in this community
There are many large families in the area who would benefit from areas to sit outside and gather together.
There are no grilling or fire pit areas in the area
There is alot here i do not like . Only lawn space we need a dog park!
There is very few bbq grils park in NE , we need it for summer family and friends gathering
There's gotta be some space for pets too not just for human
There's playground already everywhere
These are all great ideas, it was difficult to rank. I believe many people in this community love to gather around food and seating with the addition of heat sources/cooking sources would encourage more people of all ages to gather and enjoy the space. Outdoor fitness and lawn area allows for movement which is needed. Families could all get something out of the space
These are young communities with growing families that need more places for the kids to get outside and play.
These things are rare find in cornerstone.
These will cater to different ethnic groups who also live in the area
They are goodfor Its good for everyone's health and kids to play.
This area miss having a place for summer bbq and get together. There are several parks with playgrounds and exercise facilities
This is a growing community, playground is a must for young children
This is best for NE quad.
This is need our comunity
This is what I imagine being most used.
This meet my and family friends needs.
This one is quite difficult because I believe you can integrate all of them into this space

This should be all implemented into the plan
this way from children to old people, everybody has something to do in the park.
This will be a concept similar to Bowness park which is a little far from NE community. Firepit and outdoor grilling will help people around to do get togethers easily.
This will make the part attractive. Mostly parents are looking for a great and near playground to hangout with their kids
This would be great place to get to know each other in the fresh building community
To bring people together in one big space and still have their own small zones
To spend nice family time
Use
We already have flexible lawn areas.
We are missing these facilities in Cornerstone.
We dont have any fireplace in north east, not even in bus stops. Kids playground is abundantly available. We need grilling area or gathering space ehich can be used in winter times also
We don't need cooking areas in the park as they could turn pretty unhygienic if not cleaned after each use and could also result in the area not being used by other members as not everybody prefers smelling/ food odors when going outside to a park. It should be more of a common use where everyone can utilize the area all at the same time.
we have a lot of playgrounds and outdoor fitness equipment around the cornerstone and redstone neighbourhoods, but the other options are unique and would bring an older demographic outdoors more
We have lot of kids here they need kids area
We have lot of kids in this community need more family time
We have no public get together space in this quadrant of city
We live in a dense community, I believe area's such as picnic, fire pits ect would be a huge draw for people wanting to have gatherings.
We need a lot of firepot areas for people to enjoy the park even during cold season
We need a playground for all ages. Right now the park is meant for kids under 6. Older children don't enjoy the park.
We need amenities to keep children and adults active.
We need an epic park in the community. It will bring people to our beautiful area.

We need fire pit for cold weathers around the NE area. I wish there's an outdoor fitness area so I can workout in the summer. Outdoor grilling/pizza oven will be a great addition especially in the summer time. Flexible lawn area would be great to enjoy the park.
We need grilling area in NE. We have to go to other parts of the city for bbq get-together
We need more nicer and big playground for the children
We need more outdoor experiences
We need more playgrounds and green spaces. Many residents already have backyard firepits. We already have issues in Redstone with partying in the parks and broken bottles so we need to discourage late night loitering.
We need more playgrounds in the area. The playgrounds around here get so busy and once again kids are bullied cause of it.
We need outdoor fitness area, nothing is around or nearby.
We need somewhere for families to gather outside together. Somewhere to rent picnic tables and be able to cook would be good.
We need to encourage fitness for all by providing it free
We want because everyone wants beautiful picnic sites in this regional park
What i want to see in my community
What I would like to have
Will be a nice outdoor activity to gather with friends and family while enjoying the splash park
With thr demographics that live in Cornerstone they will leave all cooking area filthy and dirty
Would be good to have a play ground as so many small kids in the community
Would like more space for gatherings
Would prefer a play ground and then some picnic options,

Park 1: Seating Types

Q: Is there anything else we should consider about seating?

A bike path along the Stoney would be a dream come true.
A fire place by the seating area would be great
A large pagoda would be a nice area to gather people to be able to limit their time in the sun or to provide relief from the sun . The table is also good with movable chairs to be able to adjust where one is facing for things such as getting in out of the eyes or facing the chair to supervise children etc. Essentially a combination of outdoor table with movable chairs and a sheltered seating area would be ideal. It would be amazing to include the recliner for people to go outdoors to relax and enjoy which we do not currently have in the community.
Accommodation and weather conditions
Add more picnic tables under tree or shade for seniors
Adequate shade for seating and the rest of the park in general. Many parks in this area do not have much shade and the summers are very hot.
Again I think these are all great options and should be integrated. Ranking these is quite unfair
All above options are great
All of them are really good seating I think it would be great to see some new options/ new chair designs.
Also would love to have a bike path
Anything fixed looks better and tidy.
Anything movable will be stolen or destroyed. The theft and vandalism is quite high in these areas
anything movable, will end up being stolen. shaded areas are the best. please consider hail resistance products.
Anything moveable will end up out of place and make the space look bad.
Anything moveable will most likely be stolen. We need spaces for kids' parties and family meetings. In this area, nobody wants to walk around because there are only houses and ponds with a bunch of mosquitoes. We need places for family meetings to hang out and share with the community.
As long we have shade and picnic tables so that everyone can have a place to rest on a sunny or even rainy days
As per more useful ranking
Awesome plan

Based in my preferences. It would be nice to have a nice picnic area as we don't have options in NE other than Prairie Winds Park which is way too crowded.
Be great for some areas that can be reserved or used for family gatherings or kids birthday parties
Beach volleyball. I think we have enough playground and basketball near the area.
Because this is a newer community and trees are mature, more shade needed
Benches
Bigger tables or seating arrangements as this community tends to have larger families
bring in recliners too for seniors
Bring lots of chairs
can't think of anything
Classic display tables should be there
Consider closed heated sitting for winters
Cover from the elements to allow area usage even when raining
Covered area and large pagoda will be good options in my point
Covered area will be more usable in all weathers. I am worried movable seating can be easily misplaced
Covered for weather changes
Covered Shaded area is best because of snowy winter days and hot summer days
Cricket ground Because of huge population who play cricket
Definitely, the issue with movable chairs is that some people might end up putting them all over the place. Best would be fixed benches
do not use movable seating to prevent people from stealing it
Dog park separated small and big dogs
Don't put movable chairs and tables they will end up everywhere but on the spot where they belong
During summer time people celebrating birthdays and other parties at the park it is nice to have large shaded pavilions to accommodate large numbers of guests for families and friends to share with. And also there are only a few parks that have a shaded pavilion and it's always full during summer time.
effectiveness in Calgary's weather conditions
Elderly population might need seating that can accommodate their needs.
Ensure accessibility seating options throughout not just off to the side.

Extra bunches can add in between.
Families can enjoy the shade in summer and do outdoor activities to enjoy the time .
Fixed and large seating areas. Please do not provide moveable furniture, it will all be gone within a matter of week. Again rude but still true.
Flexible
Flexible and practical options in the order of priority
For organize party this will be great
Gazebos with fire pits so even in chilly days people are out and about
Good
Good as per rank no.
good to have couple of shade ones.
group/ shaded areas would benefit, as most families tend to stay indoors during colder months and are active outside during fairer weather.
Handi Cap
Harvest tables provide very beautiful aesthetics to the community. They are my first preference.
Have a mix of all so parties and individuals can be accommodated.
Having a big gathering space allows the community to come together and chat
Having a large quantity of chairs so multiple people can sit
Having a variety of types is important
Having fixed seating is smarter as your chairs would be stolen . Plus with picnic tables you can fit more people. And other can bring their own chairs if they need to.
Having pagoda and pavilion seating will be really useful for all sizes of groups of residents, as compared to recliner chairs which limits the number of users
Heather for winter
High chair for babies and toddlers
High Quality rubber mat in playground area to avoid any injury to Kids. Gym equipment's must be high tech.
I advise seating should not be movable and there should be shed so that people can sit under shed either snow or summer

I believe just considering dense population and elderly population usage more shady and sitting benches would be helpful
I chose the shade pavilion and pagoda because it's great for picnics with lots of people and helpful for when it's a sunny day.
I liked the covered seating areas for some shade. Marked the movable seating at the bottom as I feel this would be at risk for theft
I prefer private seating
I see a lots of time elderly people sitting together in groups so the idea of large extended tables is great
I see the movable chairs being taken. We get a lot of sun in the east so some shady areas will be great.
I think covered shaded seating area will be more used in this community. Again, my preference. Lose seating will get destroyed, removed and will need to be replaced.
I think covered spaces will be helpful to access the area when the weather is not suitable or more favorable, overall mixed sitting arrangement should be provided as it will open different choices to people
I think larger together groups with some seperated seating would be nice as lots of people already bring there own chairs to sit together
I think movable seating will end up being stolen so is a waste of money
I think till be helpful to make sure seating is accessible for all people and people who may have disabilities.
I would consider more benches just for sitting and enjoying
I would like to know why there is funding for this regional park in the middle of nowhere, while Richmond Green Regional Park, inner city, densified area was SOLD to provide funding for its upgrades despite ENMAX having record profit to the city.
I would like to see a Pickle ball court too.
I wouldnt like moveable seating as its more prone to vandalism and disorganization fo space. Covered spaces will be very well used for picnics in the summer months
Iblole the idea of having lots of seating and shade options.
Ice skating rink
If there would be swing for adults too , that would be fun.

If you place picnic tables or larger tables please make sure theres umbrellas or trees around for shade.
If you put movable seating in this area, it will "grow legs and walk away" or at the very least need to be put back in its place all the time.
In cornerstone a lot of people live with parents or grandparents so it's better to have as more as sitting space there .
Inclusiveness
Indian community loves to have families over and eat together more often than others. And i dont think there is any outdoor thing available to celebrate small functions like bdays and small events
It better
It is good.
It should be bolted on the ground.
It will be easier for orderly to have shade when it's raining and also they can sit n chat there in summers
It will be good if families can get together at same time
It would be better if the seating is not moveable so it does not end up somewhere else.
It would be great to have spaces where large groups could gather comfortably and small groups as well. It would be great to consider seating suitable for the elderly and for children
It would be nice to have a way to reserve the covered seating area that can cater to a large number of people at a time for parties/gathering.
It would be nice to have similar to prairie winds park
Keep the seats clean, please
large events bookings
Large gathering seating plan would be great
Large gatherings are more attractive to people in teh community

<p>Large pagoda is ranked #2, but #4 since it needs time to develop. In the philippines we had a hut to go back to, but having this in Calgary can help is bigger birthdays/events.</p> <p>#2 Is seating with shade seems to be high in demand due to winter ending and spring eventually pulling up. Very cozy I could infer too.</p> <p>#3 is picnic table because it acts as a dinner outside once we have our global visitors join us here in our city (maybe). But in this case, let's have our eyes on harvest tables. Origanlly, picnic tables is number #4 due to high demand of harvest tables. Though the income might entirely fund this.. although I put it as #3. As long as placement works, like near the Central Library back entrance, I guess works. I am unsure .</p> <p>#4 is movable setting because it is the least of our concerns, but it displays amazing architecture. I placed this in #3 because we infer that we need to see how well established this'll</p>
Large pagoda will provide picnic spot along with providing shade while raining.
large pagoda would be best for family gatherings.
Larger gather spaces seem better
Less chance of vandalism and more use in different weather
Like to have Recreational Centre included which would have Public Library, Indoor Swimming Pool and Sports Court like Vivo.
Look good
Looks nice
Lot of senior people in the community who like to sit together in groups under shade especially summer time
Lots of parking area and toilets
Lots of parties can be had with covered areas.
Lots of shade!! There is barely any shade in the entire area of skyview cornerstone Redstone etc so shade is a must for anyone to use it
Majority seating can be designed to accomodate groups of 8 with some options for larger or smaller groups as well. Spacing between seats would give a sense of privacy while in open public space. A mix of shade and open seating is required to make the park suitable for use across all seasons.
Make a lot of picnic tables
Make few cricket practice pitches with net. Make skateboarding park
Make more open seating where it's more further away from the parks and like in the trees and some seating areas close to the park so that parents can keep an eye on their kid's

Make seating fixed as this is the NE and anything moveable will be either stolen or thrown around the park.
Make sense to have non movable seating so people cannot move. And having shade in sun would be more ideal
Make sure seating is fixed as to prevent stealing or removal
Make sure that the seating is appealing
Making sure it's inclusive for all people with physical disabilities and old age and young kids in mind.
more accommodating, open and shaded.
More are and facilities for picnics and gathering, More trees and sheds
More lighting and seatings.
More outdoor gathering spaces for communities/families priority for group spaces than just individual chairs
More people can sit in large pagoda
More picnic table and bbq grills in the area
More seating spaces with shade will be appropriate use of available land.
More shade
More shaded areas would be best
More shaded pavilion is a must
Movable chairs have possibility of being stolen, hence it would be good to avoid it
Movable furniture can be stolen and damaged easily
Movable seating is not ideal as everything will be moved around and create a mess. A shade would be nice to have.
Movable seating should be added to any option above for people with disabilities/mobility needs/etc. From an accessibility and equity standpoint.
Movable seating should not be considered. There are so many parks where we see people misuse these type of amenities.
Movable seating will disappear or be destroyed. Bolt everything down! No dog park please!!
Movable seating will probably go missing
Movable seating would be the best choice but chances are they will be stolen soon, other options are chosen accordingly
Movable seatings should be avoided at public spaces. People do not respect putting chairs back to original place for others
Movable seats might not be good idea. Thinking of vandalism
Movable seats would just get destroyed

Movable tables might not be the best idea unless they are chained some way otherwise I'm sure they would go missing. The concept is nice but sadly I don't feel like it would last up here. Anything heavy or secured would be best
Moveable chair wouldn't be a good idea as they could be stolen pretty easily. Having a large pagoda would be nice have in the area if someone wants to host an outdoor gathering or celebration or having picnic tables for a nice family outings
Moveable seating is a horrible idea specially in the N.E. something that's fixed would be the way to go.
Moveable seating will go missing quickly. Consider how weather resistant the materials are - we get a lot of hail which can quickly damage things.
Moveable seating will move right out of the park. Anything that provides more shade is critical.
Moveable seating would be horrible. Wrecked or removed so fast.
Moveable seating would be nice but I would be concerned that it would get stolen.
Moveable seats are great indoors but it will be easier to deal with the maintenance of non moveable seating in the winter. Plus people might steal it and we tax payers don't need to keep paying for new ones.
moveable seats might be able to be moved outside the park. i would consider seating that can hardly be moved if at all
Moveable seats will cause people to steal them. With unpredictable weather its great to have shelter.
Moveable seats will get stolen in this area. We need shade from the sun in the summer.
Multiple covered shelters will be nice
Muskoka chairs look great but they are incredibly uncomfortable and difficult to get into and out of. With expected drought and heat waves the covered picnic areas are a good idea. We can't plant and maintain enough trees to create the shade we will need.
My family preference
My own interest
NA
Natural sloped grass amputheater.
Need a dog park! ar least a small fenced area
Need accessible washrooms

Need large sitting area so grandparents can sit and talk in shade or without snow on chairs, with other community members and still keep an eye on grandkids playing near by
Need shaded area for resting during summer months
Need something to protect from sun rain and snow
Need space for seniors, shaded area will be nice
Needed in a dog park
Nice garden or a walkway with lavender plants
Nice seating for dogs too
No
No
No
no
no
No
no
No all ok
no everyone wants to sit with other people, having movable tables will people that choice
No movable seating, people will misuse them.
No moveable seats, covered better, more steal seating last longer, more spots to sit. Also please consider more garbage bins
No preference
No these are great options
No, it's fine.
No.
Non movable seating area with shade trees is good concept to have rather then builing something
Non movable seats please
None
None
Nope, the options are good enough.
Nope.

Not sure. Can we have this park as we have the Westwinds Praire Park in NE. Good to have that kind of concept applied here. Westwinds Praire park has

1. tobogganing area
2. Small Play area for kids, a bigger play area for older kids
3. Firepits
4. Picnic spots/bbq with shades and option to book in advance
5. Bike , jogging, walking, routes
6. Sitting area
7. Splash park
8. Tennis Court
9. Cricket game area
10. Basket ball
11. So many Trees
12. Proper Washroom
13. and so on

Also can we have a community center built ?

Nothing

One large pavillion would be monopolized by one group. Multiple smaller seating areas would provide better availability for all.

Open theater style seating

Order Pavillion and picnic table that suits cricketers and cricket lovers watching game

Our family loves this and fits our needs.

park Area 1 Concept A

Park benches

People can celebrate birthday parties

People should have picnic option where they can spend some quality time

People will steal the furniture

permanent seating fixtures lasts longer and can accommodate more people

Personal preference

Picnic tables and large pagoda allow for different groups to enjoy the seating. Shade pavilion is nice but the seating is limited to 1-2 tables/groups. Recliners are nice too. I imagine moveable furniture would be a nightmare to put away or organize every night, could become really messy really quickly--or one large group could monopolize all the seating.

Picnic tables don't move. If you do tables moveable in this area they'll be stolen asap.

Picnic tables or areas that you can rent out for a few hours by the city would be so great!
Places to play and picnic are important
Please also build the cycling track along the Stoney.
Please consider making 4-5 cricket practice pitches for kids and seniors.
Please do add water activities and more space for children play along with shading area for seating
Please ensure this park is child friendly and can serve the needs of the thousands of Calgarians who live in Cornerstone, Skyview Ranch, Redstone, and City Scape and that it is maintained. Citizens will need signs and city personnel to teach them how to use the space in a good way otherwise the park will become a dumping ground.
Please keep kids in mind ! Small kids you can drive or take transit
Please make them so most people can use them. Mostly we noticed now in parks elderly people are using all the space and making it hard for us young parents to sit somewhere to relax and watch the kids.
Preference
Promotes community engagement
Protection from sunburn for elder people as well as for everyone is important and in rain it works well
Provide shades and benches
Ranked using usefulness
Recliner chairs around fire pit.
Reservation for bigger seating areas should be there so not just one family can enjoy the amenity.
Seating should be comfortable for seniors because we have lots of seniors in the community
Seating should be wooden and colourful. Wood is cheaper and reusable and shows Canadian culture and history for example log benches.paint every log different colours.
Seating that is not moved would be convenient as it will decrease theft.
Seating under the trees
Seating with separate fire pits would be great
Seating with shade is most helpful for me
Separate picnic tables
Several picnic areas with bbq and garbage bins
Shade and seating by playground

Shade for older adults walking and staying outside and spaces to enjoy with family picnic tables shade etc
Shade is a must. It also allows for use all year around. Movable seating will just get lost, damaged or stolen so that is not recommended. The harvest table is a great idea for large multigenerational families.
Shade pavilion
Shade pavilion is best for hot days to encourage elderly residents to come out 🙏
Shade would be nice to have since Cornerstone does not have grown up trees
Shaded and lots of benches for our elderly community members.
Shaded area will be helpful in rainy or windy days
Shaded areas would be nice
Shaded seating areas are always a plus in the summer. Movable seating can be a disadvantage due to first come first serve and I foresee chairs or tables stolen.
Shades are really important during summer and makes the area beautiful.
Shared soaves bcof the changing weather would be good
She'd is good because of weather
Shed would be helpful as during rain and snow.
Should be difficult to steal
Should be fixed seating
should be fixed to the floor to avoid theft.
Should be tough for both weather and human abusive, people are rough and not quite take good care of public stuff around here.
Should be usable in winter time also
Sitting with shade
Slightly spinning seats Pavilions but with some side walls don't have to be all the way up. Like the ones in bonus park
Small groups can enjoy the park
Small Heated area if possible
So more people can enjoy
So that family can come stay for long period in shades while kids playing nearby
Some seating arrangements in shades too.

Staggered seating means more people will optimize the seating. Shaded areas are very important for the summer, as we have limited tree cover in the area
Stationary seats maintains order and aesthetics.
Sturdy so not taken or vandalized
Swimming area or summer pool
Swimming pool or indoor amenities complex
Swming pool for kids
take into account ways to make it easier for people with disabilities to also enjoy the park and the seating. make some sort of easier access to these amenities for them. make the park as accessible as possible to wheelchair users as well
Talking about seating consideration, I would suggest anything which is under the shade will be the best as because of the weather conditions we do need shades in hot summer during windy evenings and chilly nights.
Tennis court and basketball court if have covered and flood lights on these court and main ground
That would be enough
That's good
The choices listed are all great. Maybe heating for cooler seasons.
The material should be durable and easy to clean, and mounted so people will not take them away from the designated area or steal them.
There is a bit of a seating situation in these areas where folks who gather move chairs/take chairs and I think it could prevent the greater community from using them. I think fixed seating would be most appropriate so that it stays in spaces and can be used by the whole community.
There is no such park where we can celebrate little events like birthdays or summer barbecues
There should be a consideration for all members of the community not only certain groups.
There should be a lot of option in different areas of the park (including regular benches throughout)
There should be a mix atleast 4 of the options mentioned above.
There should be many shaded pavilions and other type of seating as well.
There should be some covered area to sit and relax

There should not be any movable seating, as people will keep moving items (chairs & tables). Seating plan should be inviting and have options to book for private events as well, eg. birthday parties, BBQ/ grill in summer.
These are perfect already!
These look good!
These ones were hard to choose but I have gone with my personal perspective of keeping kids, families and relationships as top priorities and discouraging facilities that can be taken over by small groups for a very long time thus discouraging equal enjoyment by all the different groups in the community.
This area is all about community and gathering. I like the harvest table because it's both communal but makes space for those not included in the first group sitting there.
This area should also have an off leash area for dogs.
This should be included
This will keep the park more relaxing for everyone
This would put Cornerstone's value higher compared to other communities in the NE
Toddler tables/ chairs
Tons of shaded seating with firepit outside the shade.
Trees lots of big trees. That way if the seats ran out people can still gather picnic style. Lots of shade pavilion will provide privacy for smaller gathering. Moveable seating is a No No. People will just hoard seats. Drilled seats will be better since people can occupy a certain space without compromising the next table.
Try to consider seating that is convenient to groups of people, since people usually go to parks with friends and family.
Try to make more, the Corner Meadows Park is often very full and does not have enough seating for the amount of people that go there.
Unfortunately in this area if it can move (like movable chairs / tables. They will be stolen within days. We can't even keep things like that in our backyards without someone coming in and stealing it. So all it will do will up the costs around here with having to constantly replace them. Or chairs will be put thru vehicle windows or house windows. I wish I could say this is a good peaceful community but it's not it is full of gangs drugs and criminals (most who haven't been caught yet) as of lately we even have people opening gas tanks of vehicles every night (every night for the last week) this area has gotten so bad that we are now having alarm systems and cameras installed all around our property. Yes this community needs things but it needs to be things that work for all the community and things that will not cause damage or go missing
Useful for more peoples
Washrooms

Water fountains for clean drinking water, good lighting for all year usage
We do have hot weather
We don't want people to move amenities from the area
We need more fenced dog park facilities
We need more play activities for the children my half of cornerstone only has 1 park! And it's not age appropriate for my 2 and 4yr old
We need more shade and seating in our communities, not just Cornerstone! It would be awesome to see all these choices into the new regional park, and also in the other spaces of the Northeast. We see a lot of people walk and sit and finding spaces to hangout for all groups.
we should avoid movable seating as this will be a theft issue. we just need more shaded area for seating.
We should consider a sitting arrangement that offers comfortability, inclusivity by the number of chairs as well as shade and or shelter for raining and cold days
We should have large amount of seating to support the furiously growing population in our city.
We want to make sure there are shades to protect residents and chairs from weather conditions. Thank you
Wheelchair spots
Will be great to enjoy during summer
With the recent heat waves we need shaded seating. Movable seating can be stolen.
Would like some steps made out of grass and concrete mix to sit down
Wouldn't go for moveable seats as they will get destroyed or go missing
Yes , if we can make tables(wood pallets) with the sitting level on ground and people can use cushions or anything to sit on the ground with tables features and those can be mix and match sitting area with picnic tables and pargolas too
Yes, a immigration mindset, for people from different countries and backgrounds. Please make sure people get there privacy while still enjoying the community outdoors.
You can never go wrong with picnic tables and movable seating is a bad idea it can get stolen.
You can work with local business PARK production house to make it more creative and colourful. You can involve artists.

You place movable seats here and they will surely be stolen
You should consider adding seating close to parks and where kids would want to go so that parents can watch their kids without having to stand while their kids stand but then also put seating in more open areas further away from the park and where most people would be so like seating areas in or near trees and not close to the parks
You should use good quality resources so seats are comfortable.

Park 2: Amenity Options

Q: Rank the following amenity options in order of preference. Drag your choices to the empty box on the right to sort them with most preferred at the top. Why did you rank this the way you did?

Wow all great choices and should all be integrated
Would like to see a safe space for bikes rather than kids playing on streets
Winter sports nearby house.
What I think I would use.
We would like Mahogany style lakes and beaches PLEASE
We love physical activities for kids and family.
We don't have any in the nearby area. Lots of young families with children in the redstone/cornerstone
We don't have a toboggan hill nearby
We don't have a safe place to play in winter
We don't have toboggan hill near by , no activity for winter
We don't have any of these things in this end of the North east it would be nice to have even one of them
We don't have any bike park surrounding this area . Climbing wall is also a good concept for kids .
We do not have a toboggan hill that we can use in winter nearby . And we don't have bike park nearby
We could recall use an Amphitheatre!
Want to have options which will help residents and visitors to enjoy and use the services/ amenities offered
These are not found nearby
this way we can enjoy activities all year around.
This ranking is what would be most beneficial to use for my family.
This is the way I think it will be used the most
This is the best park where one can keep themselves physical fit instead of just sitting in the park and do get together.

This is all (expletive) built for white communities...we need immigrant amenities and a park for kalistan
This is a great proposal, the community needs this project to encourage more people to live close to the cornerstone area. In addition, the neighbourhood is close by and there's easy access to the Stoney Trail, so other communities and visitors can come enjoy the amenities. It's yet another fresh gift for every Calgarian. I wholeheartedly support this initiative, which benefits all Calgarians.
There are so many kids in this area. They need more place for activities which all kids can do. Also cricket is mostly played by total 22 adults. Kids don't need cricket pitch. I am Indian by the way and saying no to cricket.
There are no bike areas in the area. This would be great
There are lots of young families in the nearby communities. Many kids ride in the street and it would be safer for them to ride in the park/pathways and especially dedicated bike park.
There are a lot of young families. I believe kids and parents of all ages would greatly benefit from toboggan hill, climbing park to encourage getting outside in all weather types. Exercise equipment park for adults is also a good use of space instead of bike park or amphitheater.
The toboggan hill is a must, it's very flat here. This would be great fun in the winter.
The order in which I ranked is tied to what would make me want to get out of the house more often.
The more activities that we can all the season the better. It will encourage people to be outdoors more often.
The closest toboggan hill is Prarie winds. Build a new amazing anchor to bring people into the community
The bike park is the feature that would be the most valuable in the area. There are tons of other parks with climbing features, and a toboggan hill is close by in the NE. A bike park would be best for all the kids in the area. Also in Area 1, a large feature would be a disservice to the community since there are a tons of other ones planned nearby. A
Some snow amenities would benefit
Some are dangerous
Sledding will bring families to the park
Residents like to get together in groups and no near hill snowboard option in community
Ranked as per preference
Rank based on my interests.
Preference
Prairie winds seems to get really crowded sometimes. A climbing wall. A ice skating rink in winter. More outdoor amenities for the kids.

Physical activities are important for physical and mental health and I assume this neighborhood will have a lot of children for many years. An amphitheater is important for cultural events. As for a toboggan hill, Calgary is getting less and less snow, so it wouldn't be used much.
Pepole Love Sledding
Off leash dog park!
Nothing like that in this area
Not many outdoor climbing areas in the NE
No toboggan hill in skyview
No one will ever use the amphitheater. Climbing walls, bike paths, toboggan hills will bring people to the park.
No bike areas in NE calgary we need it here
No areas to tobogán in the corner of the city
Nice to have an amphitheatre ro bring communities together in a park or climbing walls for kids to have them motivate to go out and play more
Needs more playgrounds for kids
Need to add Cricket and Tennis
Ne does not have a skate / bike park in NE
My own interest
My kids like that
My kids are little so they would use the climbing wall and hill most.
My 7yr old daughter chose
most useful/least liability
Most Suitable.
Most kids at cornerstone like to ride their bikes in the summer and would be beneficial if they have their own toboggan hill in the winter so parents doesn't need to drive far for their kids to enjoy and experience fun activities in different seasons. Kids can climb walls and when get tired they can relax in the amphitheater later.
Most accessible by the most number of people/ages/abilities
More spaces for kids to learn to bike and are encouraged to use a bike instead of learning in parking lots and streets
More kids friendly and accessible for all younger age
More activities to do during the winter in the area.
Mass can use this area.
Mari Marji
Many activities to do
Lots of small and young kids in area, lots of seniors people in area too. We needs space we're kids can play and seniors also get to gather
Long winter days, it's great to enjoy it like this and have a play!

Live the modern amphitheater seating with grass and open area
Like winter sports
Lack of access to these features in the NE.
Kids would love it
Kids like this and we need this most .
Kids get more activities
Kids fun area. I would also suggest to consider splash park and outdoor pool.
Just trying to be inclusive; not everyone bikes or climbs.
Its would be a great plan for kids
It's not any hill in nearby. Biking space and wall climbing will support kids recreation activities.
It would be nice to have a space to hold or engage in events in the community.
It would be nice to have a public gathering place in the community. An amphitheater would provide a space for this
It would be cool to bring friends and their kids if we have these amenities in Cornerstone
It would be amazing to have a biking facility in this area, there are many kids, teenagers and adults who love biking around here! It would also encourage others to come and bike! The confederation park bike park was a wonderful addition, cornerstone would benefit from one as well!
It will introduce youth to learning to use bikes as a sport or as a mode of transportation. The amphitheater will be great in the summer to host small events for families to enjoy.
It will be most useful.
It allows residents to organize weekend activities/events
In order of what my family would use most
Importance of socializing
I would prefer a dog park
I would love a climbing wall, this seems unique - and I think it would be a great opportunity for the kids/youth/adults to get into something they may otherwise not be able to afford.
I think there should be more family activities.
I think climbing wall and bike park would be an excellent choice
I think both bike and toboggan will be use more then the other two
I really love the idea of an amphitheatre in the area.
I ranked these from the things my family and I would enjoy most to least and the things people I know would want to do use most

I ranked the activities based on mass appeal. Such activities allow newcomers to start their active routine as individuals, then mingle and form large groups and friendships in the long run, as opposed to cricket and soccer that require you to know a lot of people. NE communities are attracting people who don't have a lot of social circles in Calgary.
I ranked by how likely I would use
I like this way
I like this way
I like the most
I like a place to have a view
i just love amphitheatres honestly
I have gone with my preferences of making children a top priority for any facilities. Especially in NE, we do not have something like a Toboggan hill or an amphitheatre so I have gone with those. I am really indifferent to climbing wall or a bike park.
I have a young child and live in Cornerstone community.
I feel a theatre is for everyone to enjoy and hill is to enjoy snow thaw time
I believe north east need something new or different.
Hill will give similar experience as hiking and bike park is good for kids . All are good choices
Having a bike path is a nice way to get more people active and allows a safe space for them to ride their bikes away from traffic. A climbing wall would be nice to have as well
Have kids They would use it more
GREEN SPACE IN THE AREA
Grandkids chose their preference
Fun for the kids
Fun activities for kids
For winter sport
For the kids to enjoy
For the families and kids in the neighborhood
For hanging out.
Fits our family's needs
Fit community means healthy and happy people
Feel this is a good fit for the community with the rankings I choose. More we have better for kids and adults and seniors. Due to the community be more seniors and kids
Family together is first playing then playing gone
Everyone can use this facility.
Cozy but large amphitheater like baker park but better would be nice
Could we also please include in the plan a fenced dog park for small and large dogs
Community has kids who would enjoy these amenities

Climbing walls are really popular and fun. I haven't seen an amphitheatre and that would be cool for everyone in the park that wants to use it
Climbing and art is cool. Would be nice for gatherings and for the children to play
children get empowered when climbing
Children can bike in a dedicated area and other can sit in their own area
By use for our family
By level of personal interest but this all sounds fun
Bikes / skateboards are an adventure being pursued by a considerable amount of residents. Small hills will be an adventurous place that could be very eventful and since there's nothing like that at the moment in the newly developing community this is one of the top contender in the list.
Bike trails Re important since you can walk and ride
Bike parks are a fad - there is so many of them
bike park can benefit more people and toboggan hill is great for the snowy winter months
Bike park can be used by all and kids need activities
Bike are can be used year round
Bike and toboggan will be use more
Because we need more green space than artificial structures.
Because of the kids activities
Because it fun and will give people a chance to enjoy the outdoors in their neighborhood.
Because I liked concept B. And climbing wall will be perfect for kids
Bases on the activities most enjoyed for all seasons
Based on how people (various age group) can connect more
based on access to these amenities within/around the community
As in this community and surrounding communities there lot of young and toddlers for whom this is what needed
As i am living from almost three years in this community I feel we need more activities for kids .
An open amphitheatre fosters community building and one is needing in this region.
An amphitheatre would be great to gather the community for events/activities. A climbing wall and toboggan seems fun too. I think bike paths throughout the community would be better than having a large restricted space
Amphitheater will help community get together.
Amphitheater very unique idea would be awesome to see in Cornerstone.
Almost everyone loves to bike and toboggan. A safe area to do these activities will benefit everyone.

All of them are really great options but I think we don't have much Amphitheater here in the NE. So it would be nice to have something new and perhaps we can have more performances here.
All communities does not have this facility and we need to travel to far community to use these kinds of facilities
All ages kids love tobogganing, so it's the first choice, climbing wall can be added with the playground designs, amphitheatre a good options for all ages and ethnic cultural/community programs, there are very big open bike routes are available throughout the city so a bike park won't be much of help for most of the people.
Again taking into consideration the kids in the community and what all the newer areas are currently lacking.
A toboggan hill would be great winter use for children in addition to an amphitheater in the summer time to encourage art and communication
A nice place to sit
<ol style="list-style-type: none"> 1. Toboggan Hill will be a great activity to do in winter times and especially children will love it. As we have good 3 to 4 months of winter, it's nice to have an outdoor activity like this. 2. Amphitheater would be a great option to hangout with our closed ones during summer evenings. 3 & 4 doesn't matter to me
<ol style="list-style-type: none"> 1 Kids love winter activities, as it is north east most of the north indian citizen would like to hang out in the park. 3. It is good exercise for the kids 4. Biking 🚲 is fun
<p>#1 is a touchy topic. Apparently I should put this in between these ranks called 1 being priorities (in my opinion), but I leave it as first for the sake of reasons to why my culture doesn't mess quote on quote for this fantastic, but concerning activity. All I know is that sledding the vobaculary I would use to genuinely smile and laugh. That's because we are going to Friday fild trips and "tobagganing" down the winter hill. In short, I prefer sledding, but don't matter to me.</p> <p>#2 is defeinitely AMPtheatre since we are entering into a digital stage, There numerous amounts of films being producing, but too heavy to count. Perhaps this theatre get provide mass incites on how streams can benefit here. Point here, don't stay on the screen, enjoy yourself at the theatre!</p> <p>#3 Bikes is ranked #3. I don;t see a lot of bmx riding nowadays. Especially where I am from and grew you could say in , we used to have our bikes and race. Bringing this nostalgic is notable, but we'll see.</p> <p>#4 Climbing Walls. Last tinme I climbed walls was definitely an incredible experienced! It's true that I need to be more active, but it would definitely cost more to make in my opnion! Could we possible expand the ymca in saddletowne , aka genesis centre for this season ? I am aware of an event centre, but seems maybe #4 is a lowblow. Anyway thank you yyc. On seconds thought, I would genuinely love an AMPTHEATRE. #1 it goes in!</p>
